PREFACE . . . . .	v
-------------------	---

## CHAPTER 1

### Instrumentation

A. Instrument Design . . . . .	1
B. Ion Detection . . . . .	5
C. Sample Admission . . . . .	7

## CHAPTER 2

### Concerning Mass Spectra

A. The Production of Spectra . . . . .	11
B. The Parent Molecular Ion . . . . .	16
C. Ion-Molecule Reactions . . . . .	27
D. Metastable Ions . . . . .	30
E. Other Considerations . . . . .	33

## CHAPTER 3

### The Fragmentation of Hydrocarbons

A. The Hydrocarbons . . . . .	43
B. Cycloalkanes . . . . .	49
C. Alkenes . . . . .	53
D. Bicycloalkanes . . . . .	58
E. Cycloalkenes and Alkenylcycloalkenes . . . . .	60
F. Dialkenes . . . . .	61
G. Acetylenes . . . . .	62
H. Tricycloalkanes . . . . .	64
J. Tricyclic Alkanes . . . . .	65
K. Bicycloalkenes . . . . .	65
L. Alkenylcycloalkenes . . . . .	65
M. Alkynynes . . . . .	66
N. Aromatic Compounds . . . . .	67
P. Alkylated Aromatic Hydrocarbons . . . . .	67
Q. Hydroaromatic Compounds . . . . .	68

## CHAPTER 4

### The Fragmentation Patterns of Heterocompounds

A. Introduction . . . . .	70
B. Aliphatic Halides . . . . .	70
C. Alcohols . . . . .	70

D. Trimethylsilyl Ethers . . . . .	80
E. Methoxyl . . . . .	80
F. Mercaptans . . . . .	80
G. Aldehydes . . . . .	81
H. Acids . . . . .	81
J. Esters . . . . .	82
K. Diesters . . . . .	83
L. Nitriles and Isonitriles . . . . .	83
M. Acid Amides . . . . .	83
N. Amines . . . . .	84
P. Nitroso Groups . . . . .	84
Q. Nitro Groups . . . . .	84
R. Nitrites . . . . .	
S. Ethers . . . . .	
T. Sulphides . . . . .	
U. Ketones . . . . .	
V. Lactones . . . . .	
W. Aromatic Compounds . . . . .	
X. Cyclic Structures . . . . .	
Y. Heterocyclic Compounds . . . . .	
Z. Polyfunctional Substances . . . . .	

## CHAPTER 5

## The Mass Spectrometry of Natural Products

A. Acyclic Terpenes . . . . .	
B. Cyclic Terpenes . . . . .	
C. The Sesquiterpenes . . . . .	
D. The Diterpenes . . . . .	
E. The Triterpenes . . . . .	
F. The Steroids . . . . .	
G. Oxygenated Compounds . . . . .	
H. The Pimaric Acids . . . . .	
J. The Long-chain Esters and Acids . . . . .	
K. The Inositols and some Sugar Derivatives . . . . .	
L. The Alkaloids . . . . .	
M. The Amino Acids and Peptides . . . . .	
N. Glyceryl Esters . . . . .	
P. Lupulone . . . . .	
Q. Reduction . . . . .	
R. Isotopic Substitution . . . . .	
S. Deuteration . . . . .	
T. Hydrogen Migration Reactions . . . . .	

## CHAPTER 6

## The Mass Spectrometry of Mixtures

A. General Considerations . . . . .	
B. Fractionation . . . . .	
C. Additional Methods . . . . .	
D. Latent Heat of Change of State . . . . .	

## CHAPTER 7

**The Analysis of Spectra**

A. The Analysis of a Spectrum . . . . .	143
B. Hydrocarbons . . . . .	143
C. Epeisactic Hetero-atoms . . . . .	144
D. Mixed Hetero-atoms . . . . .	148
E. Aromatic Compounds . . . . .	152
F. Mixed Hetero-atoms . . . . .	159
G. Ausiastic Hetero-atoms . . . . .	163
H. Mixed Hetero-atoms . . . . .	168
J. Aromatic Type Compounds . . . . .	169
K. Mixed Hetero-atoms . . . . .	173
L. Mixed Systems . . . . .	173

## CHAPTER 8

**Logical Argument**
