INTRODUCTION: PROBLEMS IN THE ANALYSIS OF ORGANIC MIXTURES

1.1	General Remarks	
1.1.1	Selecting an Analytical Method	2
1.1.2	Checking a Method	2
1.1.2.1	Inconsistency of Analytical Results	2
1.1.2.2	Effect of the Environment	3
1.1.2.3	Interferences and Need for Their Removal	4
1.1.3	Improving Existing Methods; Devising New Methods	5
1.2	Analysis of Mixtures Based on the Functional-Group Characteristics of Its Components	8
1.2.1	Relative Amounts of the Functional Group to be Determined	8
1.2.1.1	Major, Minor, or Trace Components	8
1.2.1.2	Increasing the Sensitivity of a Method	9
1.2.2	Influence of Neighboring Groups	10
1.2.3	Influence of Reactive Impurities	14
1.2.4	Influence of Other Extraneous Matter and the Environment	17
1.2.5	Removal of Interferences	20
1.3	Analysis of Mixtures Based on the Molecular Properties of the Constituents; Influence of the Environment	23
1.3.1	Infrared Absorption	23
1.3.2	Ultraviolet Absorption	24
1.3.3	Fluorometry	25
1.3.4	Polarography	26
1.3.5	Other Methods	26

1.4	The Question of Sample Size: Average Sample Versus Single Sample Analysis	28
	References	32
2	PREPARATION OF THE SAMPLE AND SELECTION OF THE ANALYTICAL METHOD	44
2.1	Sampling Techniques	44
2.1.1	Samples from Bulk Materials	44
2.1.2	Laboratory Samples	46
2.2	Disintegrating and Mixing	48
2.3	Dissolution of the Sample	48
2.4	Selection of the Analytical Method	53
2.4.1	Official and Standard Methods	53
2.4.2	Choice of Unofficial Methods	54
2.5	Sequence of Operation in Analyzing Mixtures	56
2.6	Chemical Methods for Analyzing Compounds in Mixtures	57
2.7	Physical Methods for Determining Organic Compounds	67
2.7.1	Spectroscopic Methods	69
2.7.2	Nuclear Magnetic Resonance and Mass Spectrometry	70
2.7.3	Polarographic Methods	71
2.7.4	Isotopic-Dilution and Radiochemical Methods	73
2.7.5	Miscellaneous Physical Methods	75
2.8	Comparison of Analytical Methods	77
	References	80
3	DETERMINATION OF SEVERAL COMPONENTS IN A MIXTURE WITHOUT SEPARATION	96
3.1	Introductory Remarks	96
3.2	Simultaneous Determination of Acidic Compounds by Differential Titration	98
3.2.1	Titration in Nonaqueous Media	98
3.2.2	Titration in Aqueous Solutions	99
3.3	Simultaneous Determination of Basic Compounds	103
3.3.1	Direct Acid-Base Titration Methods	103
3.3.2	Indirect Acid-Base Titration Methods	107
3.4	Simultaneous Determination by Chemical Methods Other than Differential Acid-Base Titration	109

3.4.1	Methods That Use a Single Sample of the Mixture	109
3.4.2	Complete Analysis of a Mixture Using Two or More Samples	111
3.5	Analysis of Mixtures Based on Differential Reaction Rates	117
3.5.1	Separate Determination Methods	118
3.5.2	Kinetic Methods	119
3.6	Simultaneous Determination by Polarography	121
3.7	Simultaneous Determination by Absorption Spectrophotometry	126
3.7.1	General Considerations	126
3.7.2	Simultaneous Ultraviolet Spectrophotometry	128
3.7.3	Simultaneous Colorimetry	131
3.7.4	Simultaneous Infrared Spectrophotometry	134
3.8	Simultaneous Determination by Fluorometry, Phosphorometry, or Raman Spectrometry	138
3.9	Simultaneous Determination by Nuclear Magnetic Resonance Spectrometry	139
3.10	Simultaneous Determination by Mass Spectrometry	140
	References	141
4	DETERMINATION OF SEVERAL COMPONENTS INVOLVING SEPARATION	161
4.1	General Considerations	161
4.2	Selection of Separation Method	162
4.3	Separation by Gas Chromatography	162
4.3.1	Separation	163
4.3.2	Quantitation	165
4.4	Separation by Liquid Chromatography	167
4.5	Separation by Ion-Exchange, Ion-Pair, or Complexation Chromatography	168
4.6	Separation by Thin-Layer or Paper Chromatography	170
4.6.1	Applying the Sample and Developing the Chromatogram	171
4.6.2	Methods of Quantitation	171
4.7	Separation by Electrophoresis	173
4.8	Separation by Extraction	175
4.9	Separation by Distillation	177

4.10 Other Separation Techniques	178
References	179
5 SEPARATION OF ACIDIC SUBSTANCES	187
5.1 Separation by Ion-Exchange Reactions	187
5.2 Separation by Gas Chromatography	189
5.2.1 Carboxylic Acids	189
5.2.2 Sulfonic Acids	194
5.2.3 Phenolic Compounds and Thiols	195
5.3 Separation by Liquid Chromatography	197
5.4 Separation by Paper Chromatography	200
5.5 Separation by Thin-Layer Chromatography	203
5.6 Separation by Other Methods	206
5.7 Combination of Separation Methods	207
References	208
6 SEPARATION OF BASIC SUBSTANCES	220
6.1 Introductory Remarks	220
6.2 Separation on Ion-Exchange Columns	221
6.3 Separation by Gas Chromatography	223
6.4 Separation by Liquid Chromatography	228
6.5 Separation by Paper Chromatography	230
6.6 Separation by Thin-Layer Chromatography	233
6.7 Separation by Electrophoresis	241
6.8 Separation by Other Techniques	243
References	244
7 SEPARATION OF NEUTRAL SUBSTANCES	256
7.1 General Remarks	256
7.2 Separation of Compounds Possessing Oxygen Functions	257
7.2.1 Alkoxy Compounds (Ethers)	257
7.2.2 Carbonyl Compounds (Aldehydes, Ketones)	257
7.2.3 Epoxy Compounds (Olefin Oxides)	260
7.2.4 Esters	260
7.2.5 Hydroxy Compounds (Alcohols, Glycols, Polyols)	264
7.2.6 Methylenedioxy Compounds	268

Contents	xi
7.2.7 Peroxy Compounds (Peroxides, Hydroperoxides)	268
7.2.8 Quinones	269
7.3 Separation of Neutral Compounds Possessing Nitrogen Functions	270
7.3.1 Nitro Compounds, Nitrites, Nitrates	270
7.3.2 N—N Compounds	271
7.3.3 Other Nitrogen Compounds	272
7.4 Separation of Neutral Sulfur Compounds	273
7.4.1 Mercaptans, Sulfides	273
7.4.2 Sulfoxides, Sulfones, Sulfonates	274
7.4.3 Thiocyanates, Thiocarbonyls, Thiocarbamates, Thiophenes	274
7.5 Separation of Compounds Containing Unsaturated Functions	275
7.5.1 Ethylenic Hydrocarbons	275
7.5.2 Acetylenic Hydrocarbons	277
7.5.3 Unsaturated Compounds Containing Other Neutral Functions	278
7.6 Separation of Miscellaneous Neutral Compounds	278
7.6.1 Alkanes, Alicyclic Hydrocarbons, and Aromatic Hydrocarbons	278
7.6.2 Halocarbons	285
7.6.3 Neutral Organophosphorus Compounds	287
7.6.4 Organosilicon Compounds	287
7.6.5 Organometallic Compounds	289
