

CONTENTS

PREFACE	ix
1. INTRODUCTION	1
1. Lipid peroxides	1
2. Polymers	3
3. Petrochemicals	4
4. Irradiation	4
5. Miscellaneous	4
References	5
2. STRUCTURE AND REACTIVITY	7
1. Classification of peroxides	8
2. Reactivity	11
References	14
3. IODOMETRIC METHODS	15
1. General comments	15
2. Choice of solvent	16
3. Reaction conditions	18
4. Titration with thiosulphate	23
References	26
4. FERROUS ION METHODS	29
1. Introduction	29
2. Choice of reagent	30
3. Choice of solvent	30
4. Titration with titanous ions	31
5. Titration with dichromate ions	32
6. Titration with mercurous ions	33
References	36
5. FURTHER TITRIMETRIC REAGENTS	37
1. Introduction	37
2. Arsenious methods	37
3. Stannous methods	40
4. Titanous methods	41
5. Titration with anions	41
6. Sulphides and mercaptans	42
References	42

6. COLORIMETRIC METHODS	
1. Introduction	43
2. Ferrous ions	47
3. Leuco base of methylene blue	50
4. Iodine	52
5. <i>N,N'</i> -Dimethyl- <i>p</i> -phenylenediamine	53
6. Other colorimetric reagents	54
References	54
7. POLAROGRAPHIC METHODS	56
1. Introduction	56
2. Electrode reaction	57
3. Polarographic techniques for peroxides	58
4. Nature and concentration of peroxide	59
5. Solvents and supporting electrolytes	59
References	68
8. SPECTROSCOPIC TECHNIQUES	70
1. Introduction	70
2. Ultraviolet and visible absorption	70
3. Infrared absorption	71
4. Raman spectroscopy	74
References	75
9. CHROMATOGRAPHIC METHODS. (A) COLUMN CHROMATOGRAPHY	76
1. Introduction	76
2. Column techniques	78
3. Solvent medium	78
4. Stationary phase	79
5. Type of peroxide	81
References	82
10. CHROMATOGRAPHIC METHODS. (B) PAPER CHROMATOGRAPHY	83
1. Introduction	83
2. Choice of paper	83
3. Mobile phase	84
4. General techniques	84
5. Chemical structure	88
6. Detection	89
7. Class of peroxide	90
References	92
11. CHROMATOGRAPHIC METHODS. (C) THIN-LAYER CHROMATOGRAPHY	93
1. Introduction	93
2. Adsorbents	93
3. Solvent systems	94

CONTENTS

vii

4. Detection	96
5. Techniques	101
6. Applications	102
References	102
12. CHROMATOGRAPHIC METHODS. (D) GAS CHROMATOGRAPHY	104
1. Introduction	104
2. Solid support	106
3. Stationary phase	106
4. Column temperature	107
5. Functional groups	108
6. Quantitative analysis	111
References	112
13. CHOICE OF METHOD	113
1. Introduction	113
2. Concentration of peroxide	113
3. Reactivity of peroxide	115
4. Nature of the sample	116
INDEX	117
