

CONTENTS

Contributors	iii	
Preface	v	
Contents of Part II	ix	
Chapter 1	INTRODUCTION	1
	<i>Philip E. Slade, Jr.</i>	
	I. Molecular Weight Averages	2
	II. Molecular Weight Distribution	7
	References	7
Chapter 2	MEMBRANE OSMOMETRY	9
	<i>Robert D. Ulrich</i>	
	I. Theory	9
	II. Experimental	12
	III. Data Analysis	24
	Symbols	26
	References	27
Chapter 3	END GROUP DETERMINATIONS	31
	<i>Ronald G. Garmon</i>	
	I. Introduction	32
	II. Aliphatic Polyamides	39

III. Aromatic Polyamides	47
IV. Polyesters	53
V. Polyoxyalkylene Glycols and Polyurethanes	64
VI. Vinyl Polymers	68
References	72
 Chapter 4 ABSOLUTE COLLIGATIVE PROPERTY METHODS	 79
<i>Clyde A. Glover</i>	
I. Introduction	80
II. Outline of Methods	83
III. Polymer Solutions	86
IV. Interpretation of Experimental Data	90
V. Ebulliometry	105
VI. Cryoscopy	124
VII. Differential Vapor Pressure Methods	136
VIII. Vapor Pressure Osmometry (VPO)	142
Symbols	152
References	154
 Chapter 5 LIGHT SCATTERING FROM SOLUTIONS OF MACROMOLECULES	 161
<i>Edward F. Casassa and Guy C. Berry</i>	
I. Introduction	162
II. Theory	163
III. Light-Scattering Methods	234
IV. Light-Scattering Instrumentation	244
Symbols	275
References	279

Cumulative indexes will appear in Part II.
