

CONTENTS

I. Introduction ; Classification of Surface-Active Agents.....	1
I. Recognition of Surfactants in Mixtures.....	2
II. Isolation of Surfactants from Mixtures.....	3
III. Qualitative Identification of Surfactants.....	3
IV. Quantitative Determination of Surfactants	4
V. Classification of Surfactants.....	4
II. Detection, Isolation, and Estimation of Surface-Active Agents in Compositions.....	16
I. Detection of Surfactants.....	16
A. General Detection of Surface-Active Agents by the Dye Solubilization Technique.....	16
Test 2.1: Dye Solubilization Test of Hoyt.....	18
B. Detection of Ionic Surfactants.....	19
1. The Use of Antagonists.....	19
2. Detection by Interaction with Dyes of Antagonistic Ionic Type	21
Test 2.2: Color Test of Goebel.....	22
Test 2.3: Bromophenol Blue Test for Cationics of Kortlandt and Dammers.....	24
Test 2.4. Thymol Blue Test of Peter.....	24
Test 2.5: Eosin Yellowish Test of Harper, Elliker, and Moseley.....	25
Test 2.6. Weatherburn Test.....	25
3. Detection by Interaction with Surfactants of Antagonistic Ionic Type.....	26
Test 2.7: Wurtzschmitt-van der Hoeve Test.....	27
4. Detection by Precipitation with Antagonistic Electrolytes.....	27
Test 2.8: Wurtzschmitt Scheme.....	27
5. Detection by Electrolysis.....	29
Test 2.9: Goldstein Method.....	29
C. Detection of Nonionic Polyoxyethylene Derivatives.....	30
Test 2.10: Heat Test for Polyoxyethylene Derivatives	31
Test 2.11: Van der Hoeve's Test.....	32
Test 2.12. KI_3 Test.....	32
II. Isolation of Surfactants	32
A. Classification of Compositions in Which Surfactants May Be Found.....	33
B. Isolation by Extraction.....	33
1. Solubility of Surfactants in Organic Solvents.....	33
2. Direct Extraction from Aqueous Solutions.....	38
Procedure 2.13. Method of Miller, Bann, and Ponsford....	39
Procedure 2.14. Method of Parisot.....	39

Procedure 2.15: Method of Fairing and Short for Anionic Surfactants	39
3. Extraction from Inorganic Compositions	40
4. Extraction from Organic Compositions	41
C. Isolation by Ion Exchange, Adsorption, or Chromatography	42
1. Ion Exchange	42
2. Adsorption	43
3. Chromatography	45
Procedure 2.16. Method of Blandin and Desalme	45
III. Estimation of Surfactants	48
A. Estimation by Measurement of Physical Properties	48
1. Surface Tension	48
Procedure 2.17. Method of Ashton and Stead	48
Procedure 2.18. Method of Harmon	50
2. Polarographic Adsorption	51
Procedure 2.19. Method of Stackelberg and Schiitz	51
B. Estimation by Chemical Methods	53
1. Estimation by Formation of Dye-Surfactant Complexes	53
Procedure 2.20: Jones Method as Modified by Longwell and Maniece	56
Procedure 2.21: Jones Method as Modified by Edwards, Ewers, and Mansfield	58
Procedure 2.22. Moore and Kolbeson Modification	59
Procedure 2.23: Method of Karush and Sonenberg, and Wallin	59
Procedure 2.24. Looimeijer Method	60
Procedure 2.25. Method of Auerbach	61
Procedure 2.26. Method of Few and Ottewill	63
Procedure 2.27. Method of Hart and Lee	63
Procedure 2.28: Bromothymol Blue Method of Ballard, Isaacs, and Scott	64
Procedure 2.29: Method of Fogh, Rasmussen, and Skadhauge	65
2. Estimation by Reaction with Surfactants of Antagonistic Ionic Type	66
Procedure 2.30. Method of Lambert	66
Procedure 2.31. Method of Preston	67
Procedure 2.32. The Hartley-Runnicles Color Method	68
Procedure 2.33: Weatherburn Modification of Epton's Method	71
Procedure 2.34: Glazer and Smith's Modification of Epton's Method	72
Procedure 2.35. Barr, Oliver, and Stubbings Method	73
Procedure 2.36. Edwards and Ginn Modification	74
Procedure 2.37: Method of Harper, Elliker, and Moseley	75
Procedure 2.38: Wilson's Modification of Furlong and Elliker's Method	76
Procedure 2.39. Catkhuff and Boyd's Method	77

Other Methods.....	77
3. Estimation of Polyoxyethylene Derivatives.....	78
Procedure 2.40. Method of Wattman, Davis, and Speel...	78
Procedure 2.41. Dye Titration.....	79
Procedure 2.42: Resorcinol-Glucose Method of Haakh, v. Candié, and Möbus.....	79
Procedure 2.43: Starch Complex Method of MacAllister and Lisk.....	80
*III. Qualitative Analysis of Surface-Active Agents.....	87
I. Introduction.....	87
II. Qualitative Analysis by Physical Methods.....	88
A. X-Ray Diffraction.....	89
Procedure 3.1. Method of Boyd, MacQueen, and Stacy...	89
R. Infrared Absorption.....	89
Procedure 3.2. Method of Sadtler.....	89
C. Ultraviolet Absorption.....	92
Procedure 3.3. Method of Reid, Alston, and Young.....	92
III. Qualitative Analysis by Chemical Methods.....	94
A. Preliminary Examination.....	96
Test 3.4. Ignition Test.....	96
Procedure 3.5. The Sodium Fusion.....	98
Test 3.6. Sulfur and Nitrogen Tests.....	99
Test 3.7. Halogen Tests (Cl, Br, I).....	99
Test 3.8. Ionic Halogen Test (Cl ⁻ , Br ⁻ , I ⁻).....	100
Test 3.9. Fluorine Test.....	100
Test 3.10. Phosphorus Test.....	100
Procedure 3.11: Procedure for Distinguishing between Nitrogen Compounds Containing Organic Sulfur or Phos- phorus and Those Containing Inorganic Sulfur or Phos- phorus.....	101
B. Analysis for Functional Groups.....	103
1. Classification.....	103
Procedure 3.12: Procedure for Distinguishing between Class IVA1 and Class IVA2 Compounds.....	106
Procedure 3.13. Procedure for Distinguishing between Class VC1 and VC2 Compounds.....	108
2. Procedures for Functional Group Tests.....	130
Test 3.14. Acetylation Test.....	130
Test 3.15. Acrolein Test.....	131
Test 3.16. Amine Oxide Test.....	132
Test 3.17. Aromatic Sulfonate Test.....	133
Test 3.18. Biuret Test.....	134
Test 3.19. Catalytic Esterification Test.....	135
Test 3.20. Cold Phosphoric Acid Test.....	136
Test 3.21. Fehling's Test.....	137
Test 3.22. Ferric Chloride Test.....	137
Test 3.23. Formaldehyde-Sulfuric Acid Test.....	138
Test 3.24. Hydrochloric Acid Hydrolysis Test.....	139

Test 3.25. Hydroxamic Acid Test for Amides	140
Test 3.26. Hydroxamic Acid Test for Esters.....	142
Test 3.27. Morawski-Storch Test.....	144
Test 3.28. Naphthenic Acid Test.....	144
Test 3.29. Permanganate-Chloroform Test.....	145
Test 3.30. Phenolphthalein Test.....	146
Test 3.31. Phosphoric Acid Pyrolysis Test.....	146
Test 3.32. Potassium Hydroxide Test (for Quaternaries) ..	149
Test 3.33. Sodium Chloroacetate Pyrolysis Test.....	150
Test 3.34. Unsaturation Tests.....	152
Test 3.35. Anionic Test.....	153
C. Identification of Individual Surfactants	154
Procedure 3.36: Determination of Acid Number or Equivalent Weight	154
Procedure 3.37. Determination of Iodine Number.....	155
Procedure 3.38: Saponification of an Ester and Identification of the Products.....	155
Procedure 3.39: Cleavage of Polyoxyethylene Derivatives with Hydriodic Acid.....	157
Procedure 3.40: Determination of Molecular Weight by Rast Method	158
Procedure 3.41. Determination of Cloud Point.....	159
Procedure 3.42: Isolation of Long-Chain Carboxylic Acids from Their Salts.....	159
Procedure 3.43: Determination of Equivalent Weight per Metal Atom by Ashing.....	161
Procedure 3.44: Hydrolysis of Amides of Long-Chain Carboxylic Acids.....	162
Procedure 3.45: Hydrolysis of Quaternary Imidazolinium Salts.....	164
Procedure 3.46: Determination of Equivalent Weight of an Amine	165
Procedure 3.47: Determination of Hydroxyl Number of Alkylolamines.....	165
Procedure 3.48: Separation of Short-Chain Carboxylic Acids from Long-Chain Amines.....	166
Procedure 3.49: Isolation of the Cation of Amine Salts of Sulfur-Containing Anions.....	167
IV. Quantitative Analysis of Surface-Active Agents	171
I. Introduction.....	171
II. Gross Analysis	171
A. Moisture Content.....	171
Procedure 4.1: Oven Method.....	172
Procedure 4.2: Azeotropic Distillation Method.....	172
Procedure 4.3. Karl Fischer Method.....	172
B. Extraction of Actives.....	173
I. Liquid-Liquid Extraction Methods	173
Procedure 4.4. Ethanol Method of Parisot	173

2. Single-Phase Solvent Extractions.....	174
Procedure 4.5. Extraction with 95% Ethyl Alcohol.....	174
Procedure 4.6: Determination of Chloride in the Actives Extract.....	175
Procedure 4.7: Removal and Determination of Dissolved Chloride by Ion Exchange.....	175
Procedure 4.8: Actives Method of the Swiss Society for An- alytical and Applied Chemistry.....	176
Procedure 4.9. Method of Vizern and Guillot.....	177
Procedure 4.10. Acetone Extraction.....	177
Procedure 4.11. Method of Jahn.....	177
Procedure 4.12. Method of Gerber and Sporleder.....	178
Procedure 4.13. Method of Renard.....	178
C. Nonsurfactant Ingredients of the Actives Extract.....	178
Procedure 4.14. Extraction of Fatty Matter.....	178
III. Surfactants Containing No S, N, or P.....	179
A. Metal Absent (Class IA).....	179
1. Functional Group Methods.....	180
Procedure 4.15. Saponification Value.....	180
Procedure 4.16: Saponification Value of Tall Oil and Rosin Esters.....	181
Procedure 4.17: Saponification Value by Method of Leaper	181
Procedure 4.18. Determination of Rosin Acids.....	182
Procedure 4.19. Hydroxyl Value by Acetylation.....	183
Procedure 4.20. Hydroxyl Value by Propionylation.....	184
Procedure 4.21: Vicinal Hydroxyls: Method of Kruty, Segur, and Miner.....	185
2. General Methods for Polyoxyethylene Derivatives.....	187
Procedure 4.22: Phosphomolybdic Acid Method of Oliver and Preston.....	188
Procedure 4.23. Colorimetric Method of Stevenson.....	189
Procedure 4.24: Silicotungstic Acid Method of Shaffer and Critchfield.....	190
Procedure 4.25. Ferricyanide Method.....	190
Procedure 4.26: Ammonium Cobaltothiocyanate Method..	192
Procedure 4.27. Shiraeff's Direct Method.....	193
Procedure 4.28. Alkylene Oxide Content.....	193
B. N, S, or P Absent, Metal Present (Class IB).....	194
Procedure 4.29. Total Fatty Acids in Soap.....	195
IV. Surfactants Containing S, No N or P.....	197
A. Metal Absent (Class IIA).....	197
Procedure 4.30: Determination of Sulfur, According to Balthazar.....	197
Procedure 4.31. Quantitative Sulfur, Method of Ram.....	198
B. Sulfur and Metal Present (Class IIB).....	198
Procedure 4.32: Sulfur Determination by the Wet Oxida- tion Method of Du Bose and Holland.....	198

1. Organic Sulfates (Class IIB1).....	199
Procedure 4.33: Determination of Sulfur in the Organic Fraction of Sulfated Oils.....	200
Procedure 4.34: Hydrolysis of Organic Sulfates and Titration of the NaHSO_4 Formed.....	201
Procedure 4.35: Extraction of Desulfated Matter.....	203
Procedure 4.36: Hydrolysis of Organic Sulfates and Gravimetric Determination of SO_3	203
Procedure 4.37: Tetraamino Nickel Salt of Primary Alkyl Sulfates.....	203
2. Sulfonates (Class IIB2).....	204
Procedure 4.38: Petroleum Sulfonates and Oil-Soluble Sulfonates as Free Sulfonic Acids.....	205
Procedure 4.39: Colorimetric Determination of Alkylbenzenesulfonates.....	206
Procedure 4.40: Alkaryl Surfactants Determined as the 1-Methylheptylamine Salt.....	206
Procedure 4.41: Hydrolysis of Alkylbenzenesulfonates.....	207
3. General Methods for Sulfonates and Organic Sulfates.....	207
Procedure 4.42: Anionic Surfactant Determined as Free Sulfonic or Alkylsulfuric Acid.....	207
Procedure 4.43: Anionic Surfactants Determined as the 1-Amino-5-Ethoxybenzothiazole Salt.....	208
Procedure 4.44: Marron-Schifferli Procedure.....	210
Procedure 4.45: Wickbold Procedure.....	212
Procedure 4.46: Di-o-tolylguanidine Precipitation.....	213
Procedure 4.47: Anionic Surfactants Determined as the Benzidine Salt.....	214
V. Surfactants Containing N and S.....	216
Procedure 4.48: Kjeldahl Nitrogen.....	216
Procedure 4.49: Balthazar Modification of Kjeldahl Nitrogen.....	217
Procedure 4.50: Hydrolysis of Sulfated Alkyl Amides.....	217
Procedure 4.51: Hydrolysis of N-Methyltaurides (Class IVB2.1.3), Method of Parisot.....	218
Procedure 4.52: Benzidine Method of Shiraeff for N-Methyltaurides.....	218
VI. Surfactants Containing N, No S or P.....	220
A. Metal Absent (Class IIIA).....	220
1. Alkylamine Condensates (Class IIIA1.1).....	220
2. Polyoxyethylene Derivatives of Fatty Acid Amides (Classes IIIA1.1.2 and IIIA1.1.3).....	221
3. Lamepons or Maypons (Class IIIA1.2).....	221
Procedure 4.53: Alkaline Saponification of Alkylolamides.....	221
Procedure 4.54: Acid Hydrolysis of Acylated Polypeptides.....	222
4. Nonquaternary Cationic Amines (Classes IIIA1.4.2, IIIA2.1.1.2, IIIA2.2, IIIA2.3, IIIA4, IIIA5.1, IIIA5.2, IIIA6, IIIA7, and IIIA11).....	222

5. Quaternary Ammonium, Pyridinium, Quinolinium, etc., Halides (Classes IIIA9, IIIA10).....	223
Procedure 4.55: Halogen Determination.	223
Procedure 4.56: Ionic Halogen Determination.	223
6. Group Reactions for Quaternary Compounds.	224
Procedure 4.57: Dichromate Method.	224
Procedure 4.58: Ferricyanide Method.	224
Procedure 4.59: Reineckate Method.	226
Procedure 4.60: Phosphotungstate Method.....	227
Procedure 4.61: Phosphomolybdate Method.....	228
Procedure 4.62: Ammonium Cobalthiocyanate Method..	228
Procedure 4.63: Triiodide Method.	229
Procedure 4.64: Potentiometric Triiodide Method.....	230
β. Nitrogen and Metal Present (Class IIIB).....	231
VII. Surfactants Containing P.....	231
A. Metal Absent (Class VA).....	231
B. Metal Present (Class VB).....	231
Procedure 4.65: Phosphorus Determination by McFarlane's Method.....	231
Procedure 4.66: Phosphorus Determination by the Method of Victor Chemical Co.....	232
Procedure 4.67: Sodium Alkyl Phosphate, by Perchloric Acid Titration.	232
V. Separation of Mixtures of Surface-Active Agents.	238
I. Introduction.....	238
II. Methods of Separation.	241
A. Mixtures Containing No N, S, or P, and Yielding No Residue upon Ignition.....	241
Procedure 5.1: Removal of Hexane- (or Petroleum Ether-) Soluble Material.	246
Procedure 5.2: Separation of Hexane- (or Petroleum Ether-) Soluble Carboxylic Acids from Hexane- (or Petroleum Ether-) Soluble Material.....	246
Procedure 5.3: Removal of Esters of Long-Chain Carboxylic Acids by Saponification.	247
Procedure 5.4: Removal of Tertiary Acetylenic Glycols by Steam Distillation.....	250
B. Mixtures Containing No N, S, or P, but Yielding a Residue upon Ignition.....	250
Procedure 5.5: Removal of Salts of Hexane- (or Petroleum Ether-) Soluble Carboxylic Acids from Hexane- (or Petroleum Ether-) Insoluble Material.	252
C. Mixtures Containing S, No N or P, and Yielding No Residue upon Ignition.	252
D. Mixtures Containing S, No N or P, and Yielding a Residue upon Ignition Which Contains No SO_4^{2-}	252
E. Mixtures Containing S, No N or P, and Yielding a Residue Containing SO_4^{2-} upon Ignition.	253

Procedure 5.6: Separation of Anionics from Nonionics by Batch Anion Exchange.....	260
Procedure 5.7: Removal and Analysis of Carboxylic Acids from Complex with Anion Exchange Resin.....	260
Procedure 5.8: Removal of Sulfated and Sulfonated Esters from Complex with Anion Exchange Resin.....	262
Procedure 5.9: Test for Organic Sulfates in Resin-Anionic Complex.....	264
Procedure 5.10: Removal of Organic Sulfates from Complex with Anion Exchange Resin.....	265
Procedure 6.11: Removal of Sulfonic and Sulfoarboxylic Acids from Complex with Anion Exchange Resin.....	266
Procedure 5.12: Removal of α -Sulfoarboxylic Acids from Mixture with Sulfonic Acids.....	268
Procedure 5.13: Saponification of Esters in Mixtures of S-Containing Anionics.....	268
Procedure 5.14: Hydrolysis of Organic Sulfates in Ester-Free Mixtures of S-Containing Anionics.....	268
Procedure 5.15: Separation of Hexane-Soluble Sulfonic Acids from Hexane-Insoluble Sulfonic Acids.....	270
F. Mixtures Containing N, No S or P, and Yielding No Residue upon Ignition.....	271
Procedure 5.16: Test for Ammonia or Volatile Amines....	284
Procedure 5.17: Test to Distinguish Ammonia from Volatile Amines.....	284
Procedure 5.18: Preparation of an Alcohol-Soluble, Volatile Ariline-Free Material.....	284
Procedure 5.19: Separation of Nonionics, Anionics, and Ampholytics from Cationic- and Soap-Free, Petroleum Ether-Insoluble Material.....	284
Procedure 5.20: Acid Hydrolysis of Esters and/or Amides in N-Containing, Cationic-Free Mixtures.....	286
Procedure 5.21: Separation of Cationics from Nonionics and Carboxylic Acids by Batch Cation Exchange.....	288
Procedure 5.22: Separation of Nonionics and Carboxylic Acids in Petroleum Ether-Insoluble, Cationic-Free Material.....	289
Procedure 5.23: Removal of Ampholytics and Nonquaternary Cationics from Resin-Cationic Complex.....	290
Procedure 5.24: Separation and Analysis of Petroleum Ether-Soluble, Nonquaternary Cationics.....	291
Procedure 5.25: Analysis of Petroleum Ether-Insoluble Ampholytics and Nonquaternary Amines.....	295
Procedure 5.26: Removal, Separation, and Analysis of Quaternary Amines from Resin-Cationic Complex.....	297
G. Mixtures Containing N, No S or P, and Yielding a Residue upon Ignition.....	300

H. Mixtures Containing P, No N or S.....	300
Procedure 5.27: Removal of Alkylphosphoric and Carboxylic Acids from Complex with Anion Exchange Resin.	307
Procedure 5.28: Separation of Mixtures of Petroleum Ether-Soluble Alkylphosphoric and Carboxylic Acids. . .	308
Procedure 5.29: Removal of Petroleum Ether-Soluble Alkylphosphoric and Carboxylic Acids from Anionic-Free, Petroleum Ether- (or Hexane-) Soluble Material..	309
Procedure 5.30: Removal of Nonionics and Alkylphosphoric Acids from Anionic-Free, Hexane-Insoluble Material.....	309
I. Mixtures Containing S and N, No P, and Yielding No Residue upon Ignition.....	310
J. Mixtures Containing S and N, No P, and Yielding upon Ignition a Residue Which Contains No SO_4^{2-}	320
K. Mixtures Containing S and N, No P, and Yielding a Residue Containing SO_4^{2-} upon Ignition.....	320
L. Mixtures Containing N and P, No S.....	320
Procedure 5.31: Removal of Alkylphosphoric, Carboxylic, and N-Containing Carboxylic Acids from Complex with Anion Exchange Resin.....	329
Procedure 5.32: Analysis of N- and P-Containing Mixtures of Acids.....	330
M. Mixtures Containing S and P, No N.....	332
N. Mixtures Containing N, S, and P.....	334
Appendix	339
Table I. Classification of Representative Commercially Available Surfactants.....	339
Table II. Refractive Indices of Surfactants and Surfactant Raw Materials	372
Table III. Properties and Composition of Commercially Available Long-Chain Carboxylic Acids.....	381
Subject Index	387
