

THE CHEMISTRY AND BIOCHEMISTRY OF PHYTANIC, PRISTANIC AND RELATED ACIDS

A. K. LOUGH

Rowett Research Institute, Bucksburn, Aberdeen, Scotland AB2 9SB

CONTENTS

	<i>Page</i>
INTRODUCTION	5
II. OCCURRENCE AND IDENTIFICATION	7
III. PHYSICAL PROPERTIES	9
A. Melting-points	9
B. Solubility	10
C. Steric effects	10
D. Hydrophobic bonding	10
E. Effects at air-water interfaces	
F. Optical activity	11
IV. ISOLATION PROCEDURES	13
A. General techniques	13
B. Urea fractionation	13
C. Removal of unsaturated fatty acyl components	13
D. Steric hindrance to esterification	14
E. Thin-layer chromatography	14
V. STRUCTURAL STUDIES	14
A. Mass spectrometry	14
B. Nuclear magnetic resonance spectrometry	16

C. Infrared spectrometry	18
D. Oxidative degradation	19
VI. CHEMICAL SYNTHESIS	20
A. Reactions involving no change in chain-length	20
B. Reactions involving chain extension	21
1. Increase in chain-length by one carbon atom	21
2. Increase in chain-length by two or more carbon atoms	22
C. Reactions involving chain shortening	23
1. Decrease in chain-length by one carbon atom	23
2. Decrease in chain-length by two or more carbon atoms	24
VII. GAS-LIQUID CHROMATOGRAPHY	24
A. Separation of isoprenoid acids as methyl esters	24
B. Separation of diastereoisomers	27
VIII. BIOCHEMISTRY	32
A. Biosynthesis	
B. Stereochemistry of the biological conversion of phytol to phytanic acid	32
C. Catabolism of phytanic acid	33
D. Origin of isoprenoid acids other than phytanic acid	34
E. Stereochemistry of the catabolism of phytanic acid and of α -hydroxyphytanic acid	34
IX. PHYTANIC ACID IN REFSUM'S DISEASE	35
A. Distribution of phytanic acid in lipids of plasma and tissues	35
B. Enzymic defect in catabolism of phytanic acid	35
C. Possible influence of phytanic acid on polyneuropathy of Refsum's Disease	36
X. BIOLOGICAL EFFECTS OF PHYTANIC ACID	36
A. Oral administration of phytol or of phytanic acid	36
B. Enzyme studies	37
1. Lipoprotein lipase	37
2. Pancreatic lipase	37
C. Tissue-culture studies	37
1. Toxicity of phytanic and pristanic acids	37
2. Effect of phytanic acid on peripheral nerve tissues	37

CONTENTS

3

18
19
20

XI ISOPRENOID ACIDS IN RUMINANT ANIMALS

38

A. Lipids of plasma and tissues

38

B. Stereochemical aspects

39

XII ISOPRENOID ACIDS IN MARINE ORGANISMS

39

VIII ISOPRENOID ACIDS IN RECENT AND ANCIENT
GEOLOGICAL SEDIMENTS

43

A. Distribution

43

B. Stereochemistry

43

C. Origin

44
