I. INTRODUCTION	1
II LIPID COMPOSITION OF MEMBRANES	3
A. Total lipid and phospholipid content	3
1. Cell membranes	3
(a) Erythrocytes	3
(b) Liver cell membrane	4
(c) Skeletal muscle cell membrane	4
(d) Myelin	5
(e) Bacterial protoplast membrane	5
2. Sub-cellular particles	7
(a) Nuclei	7
(b) Mitochondria	7
(c) Microsomal fraction	8
(d) Chloroplasts	8
3. Implications of the phospholipid content	9
B. Cholesterol-phospholipid ratio	
1. The distribution of cholesterol in membranes	11
2. Cholesterol-phospholipid interaction	12
3. Cholesterol-phospholipid associations in the membrane	15
C. Composition of phospholipids	17
1. Variability in chemical structure	17
2. Phospholipid distribution	23
(a) Erythrocyte membrane	23
(b) Mammalian organs	25
(c) Chloroplasts	27
(d) Bacterial protoplast membrane	29
3. Significance of the phospholipid headgroup	33
D. Apolar side-chains	37
1. Variation and specificity of the paraffinic chains	37
(a) Chemical structures	37
(b) Fatty acid distribution	40
(c) Fatty acid composition of individual phospholipids	43
(d) Positional distribution of fatty acids	45
2. Fatty acid composition of membranous phospholipids	46
(a) Erythrocyte membrane	46
(b) Mammalian cell organelles	49

Contents

	<i>Page</i>
(c) Chloroplasts	51
(d) Bacterial protoplast membranes	54
3. Structure and function of the apolar side-chains	56
III. MOLECULAR ARRANGEMENTS OF LIPIDS IN BIOMEMBRANES	64
A. Current theories on membrane structure	64
1. The bimolecular lipid leaflet	64
2. The mosaic structure	69
3. The flexible membrane	81
4. Globular structures and mitochondria	84
B. Phospholipids as essential constituents of enzymes	87
1. Mitochondrial enzymes	87
2. ATP hydrolysing enzyme system	88
C. Composition and properties of the cellular barrier	89
IV. DYNAMIC ASPECTS OF MEMBRANOUS PHOSPHOLIPIDS	95
A. Metabolic pathways of phospholipids	95
1. <i>De novo</i> synthesis of phosphoglycerides	95
2. Interconversions between phosphoglycerides	99
3. Catabolism of phospholipids	101
4. Fatty acid renewal	103
B. Functions of phospholipids in membrane transport processes	106
1. Phospholipids as carriers of cations and anions	106
2. The phosphatidic acid cycle	107
3. Phospholipid involvement in swelling and contraction of mitochondria	109
(a) Phosphatidyl inositol and mitochondrial contraction	109
(b) Fatty acids and mitochondrial swelling	109
4. Functions of phospholipids in amino-acid transport and protein synthesis	111
5. Lipids and sugar transport	112
V. CONCLUDING COMMENTS	113
