

RECENT DEVELOPMENTS IN THE THIN-LAYER CHROMATOGRAPHY OF LIPIDS

DONALD C. MALINS

U.S. Fish and Wildlife Service, Bureau of Commercial Fisheries
Technological Laboratory, Seattle, Washington

CONTENTS

	<i>Page</i>
I. INTRODUCTION	303
II. ADSORPTION CHROMATOGRAPHY	303
A. Separations of classes	303
B. Separations within classes	304
1. Coating materials	304
(a) Silica gel	305
(b) Hydroxyl apatite	307
2. Derivative techniques	307
(a) Mercuric acetate adducts	307
(b) Brominated compounds	307
(c) Ozonization-reduction-TLC of glycerides	308
(d) Volatile compounds	309
III. PARTITION CHROMATOGRAPHY	309
A. Phospholipids, glycolipids, and sulfolipids	310
1. Phospholipids	310
2. Glycolipids	312
3. Sulfolipids	314
B. Commercially important lipids containing N, P, and S	315
C. Steroids	315
D. Alcohols and acids	316
E. Volatile carbonyl compounds	316
IV. REVERSED-PHASE PARTITION CHROMATOGRAPHY	316
A. Acids, esters, and alcohols	320
B. Aldehydes and ketones	322
C. Glycerides and lecithins	322
D. Sterols and steryl esters	323
E. Terpenes, vitamins, and related compounds	323

V. CHROMATOGRAPHY ON LAYERS CONTAINING COMPLEXING AGENTS	323
A. Acids	326
B. Oxygenated and hydroxylated acids	329
C. Prostaglandins	330
D. Wax esters and steryl esters	330
E. Glycerides and lecithins	331
F. Steroids and terpenes	334
G. Volatile carbonyl compounds	335
VI. PREPARATIVE THIN-LAYER CHROMATOGRAPHY	336
A. Thickness of the layer	336
B. Application of the sample	336
C. Indicators	338
D. Recovery of fractions	339
E. Chromatography of lipids prone to oxidation	339
VII. QUANTITATIVE TECHNIQUES	339
A. Analyses on the plate	341
1. Area-weight relations	341
(a) The graphical technique	341
(b) The first algebraic method	342
(c) The second algebraic method	342
(d) Applications	343
2. Photodensitometry	343
(a) Factors influencing accuracy	344
(b) The path method	345
(c) Autoradiograms	345
(d) Applications	346
B. Analyses after elution	347
1. Gravimetric techniques	348
2. Spectrophotometric techniques	349
(a) Aliphatic lipids	349
(b) Steroids	350
3. Radiometric techniques	350
4. Gas-chromatographic techniques	352
