

CONTENTS

PREFACE	xiii
GENERAL INTRODUCTION	xv
CHAPTER 1 OXIDATION METHODS	1
1. Use of Bromate	1
(a) Hydrazine	1
(b) Phenylhydrazine and Sernicarbazide	6
2. Use of Bromine	6
(a) Hydrazine	6
3. Use of N-Bromosuccinimide	8
(a) Hydrazine	8
(b) Phenylhydrazine	13
(c) Phenylhydrazine-p-Sulfonic Acid	14
(d) Isonicotinic Acid Hydrazide	14
4. Use of Ceric Sulfate	18
(a) Hydrazine	18
5. Use of Ceric Sulfate–Iodine Monochloride	19
(a) Hydrazine, Semicarbazide, Phenylhydrazine, 2,4-Dinitrophenyl- hydrazine, Monomethylhydrazine, and 1,1-Dimethylhydrazine	19
6. Use of Diethylenetetraarnmonium Ceric Sulfate	22
(a) Hydrazine	22
7. Use of Chloramine-T	23
(a) Hydrazine	23
8. Use of Chloramine-T–Iodine Monochloride	24
(a) Hydrazine	24
9. Use of Chloramine-B	24
(a) Hydrazine	24
10. Use of Chloramine-B–Iodine Monochloride	25
(a) Hydrazine	25
11. Use of Copper Oxide	25
(a) Hydrazine	25
(b) Phenylhydrazine	26
12. Use of Copper Oxide–Fehling's Solution	27
(a) Hydrazine	27
(b) Phenylhydrazine	28
13. Use of Copper Sulfate	30
(a) Hydrazine	30

14. Use of Dichromate	30
(a) Hydrazine	30
15. Use of Potassium Ferricyanide–Ascorbic Acid	31
(a) Hydrazine	31
16. Use of Ferricyanide–Ceric Sulfate	31
(a) Hydrazine	31
17. Use of Ferricyanide–Zinc Sulfate	33
(a) Hydrazine	33
18. Use of Hypochlorous Acid	35
(a) Hydrazine	35
19. Use of Hypochlorite	38
(a) Semicarbazides and Semicarbazones	38
20. Use of Iodic Acid	39
(a) Hydrazine	39
21. Use of Iodine	41
(a) 1,1-Dimethylhydrazine (UDMH)	41
(b) Disubstituted Hydrazines	42
(c) Hydrazine	42
(d) Phenylhydrazine	47
(e) Isonicotinic Acid Hydrazide	48
(f) Semicarbazide	48
(g) Diaminodimethylguanidinium Nitrate	50
22. Use of Iodate	52
(a) 1,1-Dimethylhydrazine	52
(b) 2,4-Dinitrophenylhydrazine	53
(c) Phenylhydrazine and Semicarbazide	55
(d) Di- and Triaminoguanidine and Carbohydrazide	58
(e) Hydrazine	58
(f) Isonicotinic Acid Hydrazide	71
(g) Monomethylhydrazine	72
(h) Semicarbazides , Semicarbazones, and Hydrazines	72
(i) Monosubstituted Hydrazines, their Hydrazones, and Acyl Derivatives	73
23. Use of Periodate	80
(a) Hydrazine	80
(b) Phenylhydrazine, Isonicotinic Acid Hydrazide, Semicarbazide, and Thiosemicarbazide	81
24. Use of Periodate–Iodine Bromide	81
(a) Hydrazine and Phenylhydrazine	81
25. Use of Periodate–Iodine Cyanide	83
(a) Hydrazine	83
26. Use of Permanganate	84
(a) Hydrazine	84
27. Use of Selenious Acid	102
28. Use of Thallium	102
(a) Hydrazine	102

29. Use of Vanadic Acid	104
References	106
CHAPTER 2 GASOMETRIC METHODS	108
1. Use of Bromate	108
(a) Semicarbazide	108
(b) Oxalylhydrazide, Thiosemicarbazide, Aminoguanidine, Semicarbazide, and Sernioxamazide	109
2. Use of Bromine-Hypobromite	110
(a) Semicarbazide, Semioxamazide and Oxalylhydrazide	110
3. Use of Cupric—Fehling's Solution	110
(a) Hydrazine	110
4. Use of Cupric Sulfate	111
(a) Hydrazine Derivatives	111
5. Use of Ferricyanide	116
(a) Hydrazine	116
6. Use of Iodate	117
(a) Semicarbazide	117
(b) Semicarbazide, Semioxamazide, Oxalylhydrazide, and Aminoguanidine	117
(c) Isonicotinic Acid Hydrazide	118
(d) Hydrazino Nitrogen in Biological Materials	121
(e) Hydrazine, Hydrazine Derivatives, and Hydrazides	126
(f) Hydrazino-Boron Compounds	130
7. Use of Lead Oxide	133
(a) Hydrazine, Isonicotinic Acid Hydrazide, and Benzoylhydrazide	133
8. Use of Mercuric Chloride	136
(a) Hydrazine	136
References	136
CHAPTER 3 COLORIMETRIC AND SPECTROPHOTOMETRIC METHODS	137
1. Determination of Isonicotinic Acid Hydrazide (INH)	137
(a) In Tablets	137
(b) In the Presence of p-Aminosalicylate	138
(c) In Serum , Blood, or Urine	140
(d) In Blood and Urine	153
(e) In the Presence of p-Aminosalicylic Acid	156
(f) In the Presence of Acetyl Isonicotinic Acid Hydrazide	159
2. Determination of Maleic Hydrazide	165
(a) In Plant and Animal Tissue	165
3. Determination of Hydrazine	173
(a) In Biological Materials	173
(b) In Urine	178
4. Determination of Hydrazine and Benzylhydrazine	182
(a) In Organs and Urine	182

5. Determination of 1,1-Dimethylhydrazine (UDMH)	185
(a) In Urine	185
(b) In Blood, Water, and Air	186
6. Determination of Monomethylhydrazine	197
(a) In Blood Serum	201
References	203
 CHAPTER 4 CHROMATOGRAPHIC METHODS	 205
1. Ion Exchange Chromatography	205
(a) Acetylated Isonicotinic Acid Hydrazide	205
2. Paper Chromatography	207
(a) Hydrazides	207
(b) Isonicotinic Acid Hydrazide	211
(c) INH in Blood	216
(d) INH in Isolation from Biological Materials	220
3. Thin Layer Chromatography	224
(a) Hydrazides	224
References	227
 CHAPTER 5 COULOMETRIC METHODS	 229
1. Determination of Hydrazine and Substituted Hydrazines	229
(a) Hydrazides	236
(b) Hydrazine	239
(c) 1,1-Dimethylhydrazine	240
References	247
 CHAPTER 6 POLAROGRAPHIC METHODS	 248
1. Determination of Hydrazine, Phenylhydrazine, and Semicarbazide	249
2. Determination of Isonicotinic Acid Hydrazide	250
3. Determination of <i>p,p</i> -Oxybis (Benzenesulfonyl) Hydrazide	250
References	255
 CHAPTER 7 ACID-BASE METHODS	 256
1. Aqueous Methods	256
(a) Hydrazine	256
2. Non-aqueous Methods	258
(a) Nitroguanidines	258
(b) Isonicotinic Acid Hydrazide	261
(c) Primary Hydrazides	261
References	267

CHAPTER 8 THE ANALYSIS OF MIXTURES	268
1. Hydrazine–1,1-Dimethylhydrazine Mixtures	268
(a) Acid–Baseoxidation Method	268
(b) Acid–Base—Salicylaldehyde Method	270
(c) Chromatographic Methods	272
(d) Gravimetric Oxidation Method	274
(e) Potentiometric–Spectrophotometric Acid–Base Method	275
(f) Spectrophotometric Method	281
2. Hydrazine–Monomethylhydrazine Mixtures	287
(a) Acid Base–Salicylaldehyde Methods	287
(b) Chromatographic Methods	291
(c) Oxidation (Differential) Method	297
3. Hydrazine–1,1-Dimethylhydrazine and Monomethylhydrazine– 1,1-Dimethylhydrazine Mixtures	299
(a) Acid–Base–Acetic Anhydride Methods	299
4. Hydrazine–Monomethylhydrazine–1,1-Dimethylhydrazine Mixtures	304
(a) Chromatographic Method	304
5. Hydrazine–Aniline Mixtures	308
(a) Acid–Base (Differential) Method	308
6. Hydrazine–Ammonia Mixtures	311
(a) Oxidation Methods	311
(b) Oxidation–Kjeldahl Method	314
(c) Thermogravimetric Method	315
7. Hydrazine–Ammonia–Hydrogen–Nitrogen–Argon Mixtures	317
(a) Mass Spectrometric Method	317
8. Hydrazine–Hydroxylamine Mixtures	319
(a) Bromate Oxidation Method	319
(b) Chronopotentiometric Method	320
(c) Potentiometric Oxidation Method	325
(d) Zinc Sulfate Oxidation — Ferricyanide Method	327
9. Hydrazine–Ammonium Hydroxide–Hydroxylamine Mixtures	329
(a) Mass Spectrometric Method	329
10. Hydrazine–Hydrazine Nitrate Mixtures	336
(a) Acid–Base Method	336
11. Determination of Diethylenetriamine (DETA) with either Hydrazine, Monomethylhydrazine, or 1,1-Dimethylhydrazine	338
(a) Acid–Base–Salicylaldehyde Method	338
12. Determination of Hydrazine–1,1-Dimethylhydrazine–Diethylene- triamine	342
(a) Acid–base (Two Titrants)–Salicylaldehyde Method	342
13. Determination of Hydrazine–Ammonium Thiocyanate Mixtures	345
(a) Iodate Oxidation — Volhard Method	345
References	347

CHAPTER 9	OTHER QUALITATIVE AND QUANTITATIVE TESTS	349
1.	Spot Tests	349
(a)	Hydrazine and Hydrazine-Hydroxylamine	
(b)	Nitrophenylhydrazine, 2,4-Dinitrophenylhydrazine, and Nitrophenylhydrazine Derivatives	349
(c)	Semicarbazides, Thiosemicarbazide, and Nitrophenylhydrazine	350
2.	Microbiological Tests	351
(a)	Isonicotinic Acid Hydrazide	351
3.	Field Tests	354
(a)	1,1-Dimethylhydrazine in JP-4	354
(b)	Hydrazine	355
	References	357
CHAPTER 10	THE USE OF HYDRAZINES AS ANALYTICAL REAGENTS	358
1.	Use of 1,1-Dimethylhydrazine	358
(a)	Determination of Aldehydes	358
2.	Use of 2,4-Dinitrophenylhydrazine	359
(a)	Determination of Carbonyl Compounds	359
3.	Use of 1,5-Diphenylcarbazine	362
(a)	Determination of Chromium	362
(b)	Determination of Technetium	364
4.	Use of Hydrazine	364
(a)	Determination of Alkali	364
(b)	Determination of Bromate	365
(c)	Determination of Iodide	365
(d)	Determination of Mercuric Salts	366
(e)	Determination of Iodates	366
(f)	Determination of Selenium Dioxide	366
(g)	Determination of Levulinic Acid	370
5.	Use of 2-Hydrazinobenzothiazole	370
(a)	Determination of Aliphatic Aldehydes	370
6.	Use of Isonicotinic Acid Hydrazide	372
7.	Use of Oxalyldihydrazide	372
(a)	Determination of Copper	372
8.	Use of Phenylhydrazine	373
(a)	Determination of Carbonyl Compounds	373
(b)	Determination of Molybdenum	375
9.	Use of Salicyloylhydrazide	375
(a)	Determination of Hydrazones	375
(b)	Determination of Palladium	376
10.	Use of Semicarbazide	377
(a)	Determination of Carbonyl Compounds	377
	References	378
