LIST OF ABBREVIATIONS

xv

SECTION I

Isolation and Chemistry

The Chlorophylls—An Introductory Survey

S. Aronoff

I. Introduction	3
II. Chemical Structures	6
III. Function	16
References	19

2. Extraction, Separation, Estimation, and Isolation of the Chlorophylls

Harold H. Strain and Walter A. Svec

I. Basis of Interest in Analytical Methods	22
II. Nature of Chlorophylls	23
III. Individual Chlorophylls	30
IV. Desiderata for Estimation of Chlorophylls	41
V. Alteration Products	42
VI. Extraction of Chlorophylls	47
VII. Estimation of Chlorophylls	49
VIII. Preparation of Chlorophylls	53
References	61

3. The Structure and Chemistry of Functional Groups

G. R. Seely

I. General Aspects	67
II. Chemistry of Functional Groups	76
References	103

4. Recently Characterized Chlorophylls

A. S. Holt

I. Introduction	111
II. Chlorophyll <i>d</i>	111
III. Chlorobium Chlorophylls 650 and 660	112
IV. Chlorophyllide(s) <i>c</i>	116
V. Bacteriochlorophyll <i>b</i>	116
VI. Seed-Coat Protochlorophyll	116
VII. "P750" of Blue-Green Algae	117
VIII. "F698"	117
IX. Chlorophyll <i>e</i>	117
References	117

5. The Synthesis of Chlorophyll *a**Walter Lwowski*

I. Introduction	119
II. Hans Fischer's Work on the Synthesis of Chlorophyll <i>a</i>	120
III. Woodward's Synthesis of Chlorophyll <i>a</i>	129
References	143

SECTION II

Physical Properties in Solution and in Aggregates

6. Visible Absorption and Fluorescence of Chlorophyll and Its Aggregates in Solution

J. C. Goedheer

I. Absorption and Fluorescence Spectra of Monodisperse Chlorophylls and Pheophytins	147
II. Absorption and Fluorescence of Chlorophyll Aggregates	179
III. Fluorescence and Other Luminescence Properties of Chlorophylls and Analogs	175
References	181

Infrared and Nuclear Magnetic Resonance Spectroscopy of Chlorophyll

J. J. Katz, R. C. Dougherty, and L. J. Boucher

I. Introduction ..
II. Infrared Spectra

III. Nuclear Magnetic Resonance Spectra	215
IV. Applications of Infrared and Nuclear Magnetic Resonance Spectroscopy	235
V. Concluding Remarks	248
References	249

Some Properties of Chlorophyll Monolayers and Crystalline Chlorophyll

Bacon Ke

I. Introduction	253
II. Chlorophyll Monolayers	255
III. Crystalline Chlorophyll	271
References	278

SECTION III

State of the Chlorophylls in the Cell

9. Chloroplast Structure

Roderic B. Park

I. Introduction	283
II. The Chloroplast as a Complete Photosynthetic System	284
III. Structure of Chloroplasts as Revealed by Light Microscopy ..	286
IV. Structure of Chloroplasts as Revealed by Electron Microscopy ..	291
V. Distribution of Function within Chloroplasts	298
References	309

The Procaryotic Photosynthetic Apparatus

G. Cohen-Bazire and W. R. Sistrom

I. Introduction	313
II. Structure	314
III. Control of Photopigment Synthesis	332
References	339

Spectral Characteristics of Chlorophyll in Green Plants

Warren L. Butler

I. Introduction	343
II. Early Evidence for an "Inactive" Form of Chlorophyll <i>a</i>	345

III. Absorption Spectroscopy	347
IV. Two Photosynthetic Pigment Systems	354
V. Chlorophyll Transformation during Chloroplast Development	357
VI. Fluorescence	364
VII. Orientation of Chlorophyll <i>in Vivo</i>	374
VIII. Conclusion	376
References	376
12. Absorption and Fluorescence Spectra of Bacterial Chlorophylls <i>in Situ</i>	
<i>John M. Olson and Elizabeth K. Stanton</i>	
I. Introduction	381
II. Bacteriochlorophylls	383
III. Chlorobium Chlorophylls	393
IV. Discussion	396
References	396
13. Chlorophyll-Protein Complexes	
<i>Part I. Complexes derived from Green Plants</i>	399
<i>J. C. Goedheer</i>	
I. Natural Chlorophyll-Protein Complexes .	399
II. Artificial Chlorophyll-Protein Complexes	408
References	410
<i>Part II. Complexes derived from Green Photosynthetic Bacteria</i>	413
<i>John M. Olson</i>	
I. Introduction	413
II. Bacteriochlorophyll-Protein Complex from <i>Chloropseudomonas ethylicum</i>	415
III. Modified Complex	421
References	425
<i>Part III. Optical Rotatory Dispersion of Chlorophyll-Containing Particles from Green Plants and Photosynthetic Bacteria</i>	427
<i>Bacon Ke</i>	
References	436

14. Protochlorophyll

N. K. Boardman

I. Introduction	437
II. Properties of Protochlorophyll	439
III. Protochlorophyll <i>in Vivo</i>	445
IV. Protochlorophyll Holochrome <i>in Vitro</i> ..	456
References	476

15. The Biosynthesis of Chlorophylls

*Lawrence Bogorad**Bogorad*

I. Pathways in the Formation of Chlorophylls	481
II. The Control of Chlorophyll Metabolism	502
References	506

16. Distribution of the Chlorophylls

M. B. Allen

I. Introduction	511
II. Chlorophylls of Oxygen-Evolving Photosynthetic Organisms	512
III. Bacterial Chlorophylls	516
IV. Concluding Remarks	517
References	518

SECTION IV

Photochemistry and Photophysics

17. Photochemistry of Chlorophylls *in Vitro**G. R. Seely*

I. Introduction	523
II. The Initiation of Photochemical Processes by Chlorophylls ..	524
III. Photochemical Reactions of Chlorophylls	543
References	561

18. Photochemistry of Chlorophyll *in Vivo**Leo P. Vernon and Bacon Ke*

I. Introduction	569
II. Photoreactions Associated with Pigment System I of Plants ..	571

III. Photoreactions Associated with Pigment System II ..	579
IV. Photoreactions Associated with the Bacterial Systems	583
V. Mechanism of Photochemical Reactions <i>in Vivo</i>	588
References	603
19. Physical Processes Involving Chlorophyll <i>in Vivo</i>	
<i>Roderick K. Clayton</i>	
I. Photosynthetic Units: Light-Harvesting Pigments and Photochemical Reaction Centers	610
II. Mechanisms for the Transfer and Utilization of Energy Absorbed in Photosynthetic Tissues	618
III. The Significance of Light Emitted by Chlorophylls <i>in Vivo</i>	627
IV. Conclusions	638
References	639
AUTHOR INDEX	643
SUBJECT INDEX	671
