

CONTENTS

INTRODUCTION AND NOMENCLATURE	1
HETEROCYCLIC ANALOGUES OF CYCLOPROPANE	5
. AZIRINES	6
A. 1-Azirines	6
B. 2-Azirines	10
2. AZIRIDINE	11
A. Introduction	11
B. Physical Properties and Structure	11
C. Chemical Properties	12
D. Derivatives of Aziridine	15
E. Synthetic Methods	22
F. Natural Occurrence and Compounds of Special Interest	24
3. OXIRANE OR ETHYLENE OXIDE	25
A. Introduction	25
B. Physical Properties and Structure	26
C. Chemical Properties	26
D. Nucleophilic Openings of Oxirane Rings	28
E. Acid-Catalysed Openings of Oxirane Rings	31
F. Other Openings of Oxirane Rings	33
G. Functional Derivatives of Oxiranes	34
H. Synthetic Methods	35
I. Natural Occurrence and Compounds of Special Interest	27
4. THIIRANE	39
A. Introduction	39
B. Thiirenes	39
C. Physical Properties and Structure of Thiirane	40
D. Chemical Properties	41
E. Synthetic Methods	43

CONTENTS

5. DIAZIRENE AND DIAZIRIDINE	4
.....	4
.....	53
1. AZETIDINE	54
A. Introduction	54
B. Physical Properties and Structure	54
C. Chemical Properties of Azetidines	54
D. Substituted Azetidines	56
E. Synthetic Methods	56
F. Natural Occurrence and Compounds of Special Interest	56
2. AZETIDINONES	59
A. Introduction	59
B. Physical Properties and Structure	59
C. Chemical Properties	60
D. Substituted Derivatives, excluding Penicilli	60
E. Synthetic Methods, excluding Penicillin	60
F. Natural Occurrence and Compounds of Special Interest	60
3. OXETENE AND OXETANE	6
A. Introduction	6
B. Oxetenes	6
C. Physical Properties and Structure of Oxetane	6
D. Chemical Properties of Oxetane	7
E. Derivatives of Oxetane	7
F. Synthetic Methods	7
4. OXETANONES	
A. Introduction	
B. Physical Properties and Structure	
C. Chemical Properties	
D. Derivatives of Oxetanone	
E. Synthetic Methods	
5. THIETE AND THIETANE	
A. Introduction	
B. Thiete	
C. Physical Properties and Structure of Thieta	
D. Chemical Properties	
E. Synthetic Methods	

CONTENTS

xii

6. FOUR-MEMBERED RINGS WITH TWO
HETEROATOMS

C. Dioxetane	84
D. Dithietane	84

III. HETEROCYCLIC ANALOGUES OF CYCLOPENTADIENE
WITH ONE HETEROATOM 89

✓ 1. PYRROLE 89

A. Introduction	89
---------------------------	----

B. Physical Properties and Structure	89
--	----

C. Chemical Properties	92
----------------------------------	----

D. Derivatives of Pyrrole	101
-------------------------------------	-----

E. Synthetic Methods	113
--------------------------------	-----

F. Natural Occurrence and Compounds of Special Interest	116
--	-----

G. Derivatives of Pyrrole	113
-------------------------------------	-----

H. Synthetic Methods	113
--------------------------------	-----

I. Natural Occurrence and Compounds of Special Interest	116
--	-----

✓ 2. FURAN 122

A. Introduction	122
---------------------------	-----

B. Physical Properties and Structure	124
--	-----

C. Chemical Properties	126
----------------------------------	-----

D. Derivatives of Furan	132
-----------------------------------	-----

E. Synthetic Methods	149
--------------------------------	-----

F. Natural Occurrence and Compounds of Special Interest	151
--	-----

3. THIOPHENE 151

A. Introduction	151
---------------------------	-----

B. Physical Properties and Structure	151
--	-----

C. Chemical Properties	151
----------------------------------	-----

D. Derivatives of Thiophene	151
---------------------------------------	-----

E. Synthetic Methods	68
--------------------------------	----

F. Natural Occurrence and Compounds of Special Interest	170
--	-----

B. Phosphorus	180
C. Silicon .	181
D. Boron .	182
E. Aluminium	182
IV. FUSED RING SYSTEMS INVOLVING PYRROLE, FURAN, AND THIOPHENE RINGS	
1. INDOLE	189
A. Introduction	189
B. Physical Properties and Structure	190
C. Chemical Properties	191
D. Derivatives of Indole	196
E. Synthetic Methods	205
F. Natural Occurrence and Compounds of Special Interest	
2. ISOINDOLES	
3. INDOLIZINE AND CYCLAZINE	214
4. BENZOFURAN	216
A. General Properties	216
B. Synthetic Methods	217
5. DIBENZOFURAN	219
6. ISOBENZOFURANS	
7. BENZO[<i>b</i>] THIOPHENE AND RELATED COMPOUNDS	
A. Physical Properties and Structure	
B. Chemical Properties and Derivatives	
C. Synthetic Methods	
D. Benzo[<i>c</i>] thiophene	
E. Compounds of Special Interest	
V. HETEROCYCLIC ANALOGUES OF BENZENE WITH ONE HETEROATOM	
1. PYRIDINE	
A. Introduction	
B. Physical Properties and Structure	
C. Chemical Properties	
D. Derivatives of Pyridine	

E. Synthetic Methods	270
F. Natural Occurrence and Compounds of Special Interest	275
2. PYRYLIUM SALTS AND PYRANS	281
A. Introduction	281
B. Pyrylium Salts	282
C. 2 <i>H</i> -Pyrans	283
D. 2-Pyrones	284
E. 4 <i>H</i> -Pyrans and 4-Pyrones	285
F. Reduced Pyrans	288
G. Sulphur-Containing Analogues	290
H. Phosphabenzenes	291
VI. HETEROCYCLIC ANALOGUES OF NAPHTHALENE WITH ONE HETEROATOM	298
1. QUINOLINE	299
A. Introduction	299
B. Physical Properties and Structure	299
C. Chemical Properties	300
D. Derivatives of Quinoline	306
E. Synthetic Methods	311
F. Natural Occurrence and Compounds of Special Interest	316
2. ISOQUINOLINE	320
A. Introduction	320
B. Physical Properties and Structure	321
C. Chemical Properties	322
D. Derivatives of Isoquinoline	325
E. Synthetic Methods	327
3. QUINOLIZINE	329
4. ACRIDINE AND PHENANTHRIDINE	332
A. Introduction	332
B. Acridine	332
C. Phenanthridine	335
5. BENZOPYRYLIUM SALTS AND BENZOPYRANS	337
A. Introduction	337
B. The Anthocyanins	337
C. Benzo-2-pyrones	342
D. Benzo-4-pyrones	344

VII. COMPOUNDS WITH TWO HETEROATOMS IN A FIVE-MEMBERED RING	353
1. PYRAZOLE AND IMIDAZOLE	354
A. Introduction	354
B. Physical Properties and Structure	355
C. Chemical Properties and Synthetic Methods	
D. Derivatives of Pyrazole and Imidazole	
E. Compounds of Special Interest and Natural Occurrence	
2. ISOXAZOLE AND OXAZOLE	
A. Introduction	
B. Physical Properties and Structure	
C. Chemical Properties and Synthetic Methods	
D. Derivatives and Compounds of Special Interest	
3. ISOTHIAZOLE AND THIAZOLE	
A. Introduction	
B. Physical Properties and Structure	
C. Isothiazoles	
D. Thiazole, Chemical Properties and Synthetic Methods	
E. Derivatives of Thiazole	
F. Thiazoles of Natural Occurrence and Special Interest	
4. DIOXOLE, DIOXOLANE, AND THEIR SULPHUR DERIVATIVES	
VIII. COMPOUNDS WITH TWO HETEROATOMS IN A SIX-MEMBERED RING	
1. PYRIDAZINE	
2. PYRIMIDINE	
A. Introduction	
B. Physical Properties and Structure	
C. Chemical Properties of Pyrimidine and its Derivatives	
D. Synthetic Methods	
E. Natural Occurrence and Compounds of Special Interest	
3. PYRAZINES	

CONTENTS		xvii
4. OXAZINES AND THIAZINES		410
A. Introduction		410
B. 1,3-Oxazines		411
C. 1,4-Oxazines and Thiazines		412
5. DIOXANES AND THEIR SULPHUR ANALOGUES		414
 IX. SOME COMPOUNDS WITH MORE THAN TWO HETERO- ATOMS		
1. PURINES		419
A. Introduction		419
B. The Structure, and Chemical Reactions of Purine and its Simple Derivatives		420
C. Synthetic Methods		422
D. Purines of Special Interest		424
2. PTERIDINES		
3. TRIAZINES		
4. SYDNONES		435
5. BENZOTRIAZOLES		437
 X. HETEROCYCLIC COMPOUNDS WITH SEVEN-MEMBERED AND LARGER RINGS		
1. BOREPINE		441
2. AZEPINE		442
A. Introduction and Structure		442
B. Chemical Properties and Reactions		443
C. Synthetic Methods		446
3. DIAZEPINES		
4. OXEPINE		450
5. THIEPIN		453
6. LARGE-RING HETEROCYCLES		456
A. Azocines		456
B. Azonines		459
 COMPOUND INDEX		 463
 SUBJECT INDEX		 493
