

## CONTENTS

	PAGE
List of Contributors	viii
1. The biosynthesis of phenolic compounds from activated acetic acid units	1
R. W. RICKARDS	
2. Some structural and biogenetic relationships of plant phenolics	20
W. B. WHALLEY	
3. The biosynthesis of isoflavones	59
H. GRIEBACH	
4. Isoprenoid units in natural phenolic compounds	74
W. D. OLLIS and I. O. SUTHERLAND	
5. Some recent studies relating to the intramolecular free radical coupling of phenols	
C. H. HASSALL and A. I. SCOTT	
6. Recent work on gallotannins	134
R. D. HAWORTH	
7. The biosynthesis of gallic acid	137
E. HASLAM	
8. Tannins from algarobilla	139
O. T. R. SCHMIDT	
9. Biflavonyls	
W. BAKER and W. D. OLLIS	
10. New phenolic C-glycosides in plants	185
L. HÖRHAMMER and H. WAGNER	
11. The betacyanins, a class of red pigments in the <i>Centrospermae</i>	194
A. DREIDING	
12. A new family of antibiotics	213
W. D. OLLIS and I. O. SUTHERLAND	
Index	233
