

CONTENTS

OVERVIEW

1. NMR and Macromolecules 3

NMR OF SOLID POLYMERS

2. An Introduction to NMR Spectroscopy of Solid Samples 21
3. Molecular Motion in Glassy Polystyrenes 43
4. Solid State ^2H NMR Studies of Molecular Motion: Poly(butylene terephthalate) and Poly(butylene terephthalate)-Containing Segmented Copolymers 55
5. Spin Relaxation and Local Motion in a Dissolved Aromatic Polyformal 67
6. Characterization of Molecular Motion in Solid Polymers by Variable Temperature Magic Angle Spinning ^{13}C NMR 83

NEW TECHNIQUES IN NMR OF LIQUID POLYMERS

7. New NMR Experiments in Liquids 97
8. Application of the INEPT Method to ^{13}C NMR Spectral Assignments in Low-Density Polyethylene and Ethylene-Propylene Copolymer 119

NMR OF LIQUID POLYMERS

9. ^{13}C NMR IN Polymer Quantitative Analysis 131
10. The Synthesis of Novel Regioregular Polyvinyl Fluorides and Their Characterization by High-Resolution NMR 153
11. The Composition and Sequence Distribution of Dichlorocarbene-Modified Polybutadiene by ^{13}C NMR 167
12. NMR Spectra of Styrene Oligomers and Polymers 181
13. 75-MHz ^{13}C NMR Studies on Polystyrene and Epimerized Isotactic Polystyrenes 197
14. Sterospecific Polymerization of α -Olefins: End Group and Reaction Mechanism 223
15. Structural Characterization of Naturally Occurring cis-Polyisoprenes 233
16. A ^{13}C NMR Study of Radiation-Induced Structural Changes in Polyethylene 245
