

CONTENTS

MECHANISM, INSTRUMENTATION, CALIBRATION, AND DATA TREATMENT

1. Mathematical Modeling of Particle Chromatography	3
2. Computer Model for Gel Permeation Chromatography of Polymers	25
3. Pressure-Programmed Controlled-Flow Supercritical Fluid Chromatograph	47
4. Automated Data Analysis System for a Gel Permeation Chromatograph with Multiple Detectors	57
5. Comparison of Size Exclusion Chromatography Calibration Techniques Using Narrow and Broad Molecular Weight Distribution Standards	73
6. Size Exclusion Chromatography of Polyethylenes: Reliability of Data	97
7. Gel Permeation Chromatography Correction Procedure for Imperfect Resolution	113
8. Size Exclusion Chromatography Molecular Weight Separation and Column Dispersion: Simultaneous Calibration with Characterized Polymer Standards	125
9. Evaluation of Fuzes Statistical Methods for Testing Identity of Size Exclusion Chromatography Molecular Weight Distributions of Polymers	135

OPERATIONAL VARIABLES, COLUMN TECHNOLOGY, AND OLIGOMERS

10. A New Family of Organic Polymer-Based High-Efficiency Gel Permeation Chromatography Columns	145
11. Optimization of Resolution in Gel Permeation Chromatographic Separation of Small Molecules	171
12. High-Performance High-Speed Gel Permeation Chromatography: A Systems Approach	189
13. Deuterium Oxide Used to Characterize Columns for Aqueous Size Exclusion Chromatography	207
14. Methylene Chloride-Hexafluoroisopropyl Alcohol (70 / 30): Use in High-Performance Gel Permeation Chromatography of Poly(ethylene terephthalate)	219
15. Shear Degradation of Very High Molecular Weight Polymers in Gel Permeation Chromatography	227
16. High-Efficiency Gel Permeation Chromatography: Applications Chromatography	257

COPOLYMERS, BRANCHING, AND CROSS-LINKED NETWORK ANALYSIS

18. High-Temperature Size Exclusion Chromatography of Polyethylene	273
19. Development of a Continuous Gel Permeation Chromatography Viscosity Detector for the Characterization of Absolute Molecular Weight Distribution of Polymers	281
20. Size Exclusion Chromatography with Low-Angle Laser Light-Scattering Detection: Application to Linear and Branched Block Copolymers	295
21. Determination of Thermoset Resin Cross-link Architecture by Gel Permeation Chromatography	321

22. Size Exclusion Chromatography Analysis of Epoxy Resin Cure Kinetics	333
23. Sulfonated Polystyrene-divinylbenzene Networks: Scission Study Using Aqueous Size Exclusion Chromatography	355
24. Fractionation and Characterization of Commercial Cellulose Triacetate by Gel Permeation Chromatography	365
