

CONTENTS

Preface	ix
1. Resonant Electron Scattering and Anion States in Polyatomic Molecules	1
K. D. Jordan and P. D. Burrow	
2. Negative Ion States of Polyatomic Molecules	11
L. G. Christophorou	
3. Electronic States and Excitations in Polymers	35
J. J. Ritsko	
4. Exciton States and Exciton Transport in Molecular Crystals	45
R. Silbey and R. Munn	
5. Percolation of Molecular Excitons	57
R. Kopelman	
6. Localization of Electronic States in Polymers and Molecular Solids .	65
C. B. Duke	
7. Electronic Structure of Some Simple Polymers and of Highly Conducting and Biopolymers	73
J. Ladik, S. Suhai, and M. Seel	
8. Spectroscopic Studies of Polydiacetylenes	81
D. Bloor	
9. Bond Length Alternation and Forbidden Energy Gap in Conjugated Periodic Polymers	105
M. Kertesz, J. Koller, and A. Azman	
10. Models of Radical Cation States in Molecules, Molecular Solids, and Polymers	113
C. B. Duke	
11. Intermolecular Relaxation Effects in the Ultraviolet Photoelectron Spectroscopy of Molecular Solids: Molecular-Ion States in Aromatic Pendant Group Polymers	121
W. R. Salaneck	
12. Band Structure Calculations and Their Relations to Photoelectron Spectroscopy	151
J.-M. André, J. Delhalle, and J. J. Pireaux	
13. Electronic Structure of Polymers: X-Ray Photoelectron Valence Band Spectra	169
J. J. Pireaux, J. Riga, R. Caudano, and J. Verbist	

14. Identification of Chemical States by Spectral Features in X-Ray Photoelectron Spectroscopy C. D. Wagner	203
15. Chemical Labels to Distinguish Surface Functional Groups Using X-Ray Photoelectron Spectroscopy (ESCA) C. D. Batich and R. C. Wendt	221
16. Interactions of Ion Beams with Organic Surfaces Studied by XPS, UPS, and SIMS J. W. Rabalais	237
17. The Modification, Degradation, and Synthesis of Polymer Surfaces Studied by ESCA D. T. Clark	247
18. X-Ray Photoelectron Spectroscopy for the Investigation of Polymer Surfaces A. Dilks	293
19. Surface Studies on Multicomponent Polymer Systems by X-Ray Photoelectron Spectroscopy H. R. Thomas and J. J. O'Malley	319
20. Metal–Polymer Interfaces: Studies with X-Ray Photoemission J. M. Burkstrand	339
21. Surface Characterization of Plasma-Fluorinated Polymers M. Anand, R. E. Cohen, and R. F. Baddour	353
22. ESCA and SEM Studies on Polyurethanes for Biomedical Applications B. D. Ratner	371
23. Surface Analysis of Silicon:Alloyed and Unalloyed LTI Pyrolytic Carbon R. N. King, J. D. Andrade, A. D. Haubold, and H. S. Shim	383
24. Oxidation of Polystyrene and Pyrolytic Carbon Surfaces by Radiofrequency Glow Discharge G. K. Iwamoto, R. N. King, and J. D. Andrade	405
25. ESCA Studies of Polyimide and Modified Polyimide Surfaces H. J. Leary, Jr. and D. S. Campbell	419
Index	437
