

CONTENTS

SPECIAL AND INTRODUCTORY LECTURES

Perspektiven der Biogenese und der Chemie der Terpene	493
Progress in the total synthesis of steroids	525
Conformation and reactivity of medium-sized ring compounds	545
The total synthesis of a tetracycline	561
Mass spectrometric investigations in the steroid, terpenoid and alkaloid fields	575
The biogenesis of certain alkaloids	601
Recentes structures d'alcaloides du type akuammicine	635
Photochemical transformations of natural products	663
Some aspects of chemotaxonomy	679
The chemistry of the aphid colouring matters	709
