

CONTENTS

PLENARY LECTURES

| | |
|-----------------------------------------------------------|----|
| The impact of natural product chemistry on medicine | 1 |
| General methods for the construction of complex molecules | 19 |

SECTION LECTURES

Section 1: Polysaccharides

| | |
|---------------------------------------------------------------------------------------------|----|
| Introductory remarks by the honorary president of the section | 39 |
| The exudate gums and their structural relationship to other groups of plant polysaccharides | 43 |
| The chemical structure of the cell wall of Gram-positive bacteria | 57 |

Section 2: Structural elucidation of natural products other than macromolecular compounds

| | |
|---------------------------------------------------------------|----|
| Introductory remarks by the honorary president of the section | 71 |
| The chemistry of insect hormones and insect pheromones | 75 |
| The ginkgolides | 89 |

Section 3: Biosynthesis

| | |
|---------------------------------------------------------------|-----|
| Introductory remarks by the honorary president of the section | 115 |
| Biosynthesis of the indole and colchicum alkaloids | 117 |
| Biosynthetic pathways from acetate to natural products | 137 |

Section 4: Chemical taxonomy

| | |
|--------------------------------------------------------------------------|-----|
| Introductory remarks by the honorary president of the section | 169 |
| Chemical characters in plant taxonomy: some possibilities and limitation | 173 |
| Plant systematics and phylogeny | 189 |
