

CONTENTS

PLENARY LECTURES

Primary structure determination of peptides and proteins by mass spectrometry	313
Some studies in the biosynthesis of terpenes and related compounds	331
Nucleic acid synthesis	349
Progress in the synthesis of polycyclic natural products: The total synthesis of lycopodine	383
The chemistry of proteolytic enzymes	403
Chemistry of bioluminescence	421
Recent progress in chlorophyll and porphyrin chemistry	443
Characterization of Staphylococcal nuclease and the status of studies on its chemical synthesis	461
Mass spectrometry of natural and synthetic peptide derivatives	489
Recent advances in the chemistry of natural products	519
