## CONTENTS

### **Biotransformation of Alkaloids**

I. Introduction	1
II. Survey of Alkaloid Transformations	3
III. Summary	69

### **Nitrogen-Containing Metabolites From Marine Cyanobacteria**

I. Introduction	75
II. Alkaloidal Chemistry of Marine Cyanobacteria	86
III. Conclusions and Future Trends	174

### **The Isoxazole Alkaloids Lisa Rahbaek and Carsten Christophersen**

I. Introduction	186
II. Isoxazoles from Bacteria	186
III. Isoxazoles from Mushrooms	192
IV. Isoxazoles from Higher Plants	194
V. Isoxazoles from Marine Sponges	200
VI. The Aerophobins and Related Alkaloids	208
VII. The Aerothionins	228

### **Ellipticine, Uleine, Apparicine, and Related Alkaloids**

I. Introduction	235
II. Ellipticine and Related Alkaloids	236
III. Uleine and Related Alkaloids	247
IV. Apparicine and Related Alkaloids	258

<b>Index</b>	<b>283</b>

## CONTENTS

CONTRIBUTORS . . . . .	vii
PREFACE . . . . .	ix

### Protoberberine Alkaloids

EMIDIO VASCONCELOS LEITAO DA-CUNHA, IVANA MARIA FECHINE,  
DIEGO NUNES GUEDES, JOSÉ MARIA BARBOSA-FILHO, AND  
MARCELO SOBRAL DA SILVA

I. Introduction . . . . .	1
II. The Organization of the Data . . . . .	2
III. Chemotaxonomic Compilation of Protoberberine Alkaloids . . . . .	2
IV. Biological Activity of the Protoberberine Alkaloids . . . . .	57
V. <sup>13</sup> C NMR Data of the Protoberberine Alkaloids . . . . .	58
VI. Summary . . . . .	59
VII. Conclusions . . . . .	59
Acknowledgments . . . . .	59
References . . . . .	60

### The *Stemona* Alkaloids

RONALDO A. PILLI, GIOVANNI B. ROSSO, AND  
MARIA DA CONCEIÇÃO F. DE OLIVEIRA

I. Introduction . . . . .	77
II. Structural Classification . . . . .	79
III. Synthesis . . . . .	140
IV. Biological Activity . . . . .	165
V. Natural Sources . . . . .	166
References . . . . .	171

### Alkaloids of the Hernandiaceae Occurrence and a Compilation of their Biological Activities

LUCIA M. CONSERVA, CYNARA DE ARAÚJO B. PEREIRA, AND  
JOSÉ MARIA BARBOSA-FILHO

I. Introduction . . . . .	175
II. Classification of the Alkaloids of the Hernandiaceae . . . . .	176
III. Summary . . . . .	223
IV. Conclusions . . . . .	223

Appendix . . . . .	224
<b>Acknowledgments</b> . . . . .	235
References . . . . .	235
Cumulative Index of Titles . . . . .	245
Index . . . . .	253

## CONTENTS

### Regulation of Alkaloid Biosynthesis in Plants

PETER J. FACCHINI

I. Introduction . . . . .	1
II. Alkaloid Biosynthetic Pathways . . . . .	2
III. Regulation of Alkaloid Biosynthesis . . . . .	16
IV. Applications of Genomics to the Study of Alkaloid Biosynthesis. . . . .	28
V. Metabolic Engineering of Alkaloid Pathways . . . . .	29
VI. Future Prospects. . . . .	34
Acknowledgments . . . . .	35
References . . . . .	35

### Ergot Alkaloids – Biology and Molecular Biology

CHRISTOPHER L. SCHARDL, DANIEL G. PANACCIONE AND PAUL TUDZYNSKI

I. Introduction . . . . .	45
II. Through the Ages: A History of Ergot Alkaloid Use. Abuse. and Poisoning . . . . .	48
III. Ergot Alkaloid Producers . . . . .	50
IV. Biosynthetic Pathways and Genes. . . . .	53
V. Routine Analytical Methods for Ergot Alkaloids. . . . .	75
VI. Ergot Alkaloid Activities and Roles . . . . .	76
VII. Summary and Conclusions. . . . .	80
Acknowledgments . . . . .	82
References . . . . .	82

### Chemical and Biological Aspects of *Narcissus* Alkaloids

JAUME BASTIDA, RODOLFO LAVILLA AND FRANCESC VILADOMAT

I. Introduction. . . . .	87
II. <i>Narcissus</i> Alkaloids and their Occurrence . . . . .	91
III. Biosynthetic Pathways. . . . .	99
IV. Synthetic Studies. . . . .	114
V. Spectroscopy and Alkaloid Data . . . . .	127
VI. Biological and Pharmacological Activities . . . . .	153
References . . . . .	163

## **1. The C<sub>18</sub>-Diterpenoid Alkaloids** **1**

Feng-Peng Wang, Qiao-Hong Chen and Xiao-Tian Liang

I. Introduction	1
II. Classification, distribution, and occurrence	3
III. NMR spectroscopy	5
IV. Chemical reactions	30
V. Pharmacological activity	33
Acknowledgments	73
References	73

## **2. Cyclopeptide Alkaloids from Higher Plants** **79**

Ademir Farias Morel, Graciela Maldaner and Vinicius Ilha

I. Introduction	79
II. Classification	80
III. Occurrence in Nature	111
IV. New Cyclopeptide Alkaloids (2006–2008)	111
V. Structure Elucidation and Stereochemistry	124
VI. Synthesis	126
VII. Biosynthesis	130
VIII. Biological Activity	131
IX. Conclusions	135
Acknowledgments	135
References	136

## **3. Alkaloids Toxic to Livestock** **143**

Russell J. Molyneux and Kip E. Panter

I. Introduction	144
II. Pyrrolidine Alkaloids	146
III. Piperidine Alkaloids	147
IV. Bipiperidine Alkaloids	151
V. Pyridine Alkaloids	154
VI. Polyhydroxy Indolizidine Alkaloids and Related Pyrrolizidine and Nortropane Alkaloids	158
VII. Quinolizidine Alkaloids	169

VIII. Tropane Alkaloids	176
IX. Pyrrolizidine Alkaloids	179
X. Isoquinoline Alkaloids	188
• XI. Diterpene (Larkspur) Alkaloids	191
XII. Diterpene (Yew) Alkaloids	196
XIII. Steroidal (Veratrum) Alkaloids	199
XIV. Steroidal (Zigadenus) Alkaloids	203
XV. Conclusions and Outlook	206
References	206

#### **4. Determination of Alkaloids through Infrared and Raman Spectroscopy** **217**

Malgorzata Baranska and Hartwig Schulz

i. Introduction	218
II. General Overview of the IR Spectrum of Nitrogen Bridgehead Compounds: Bohlmann Bands	219
III. Purine Alkaloids	220
IV. Opioid Isoquinoline Alkaloids	228
V. Natural Isoquinoline Alkaloid Dyes	233
VI. Antimalarial Isoquinoline and Naphthylisoquinoline Alkaloids	234
VII. Benzylisoquinoline Alkaloids	239
VIII. Tropane Alkaloids	241
IX. Pyrrolidine Alkaloids	243
X. Piperidine Alkaloids	244
XI. Quinolizidine Alkaloids	246
XII. Monoterpenoid Indole Alkaloids	248
XIII. Protoalkaloids	251
XIV. Conclusions	252
References	253

*Cumulative Index of Titles* **257**

*Subject Index* **267**
