

## CONTENTS

<b>1 Introduction</b>	<b>1</b>
References	3
<b>2 Amino Acids</b>	<b>4</b>
2-1 Occurrence	4
2-2 Ionic Properties	7
2-3 Chemical Reactivity of $\alpha$ -Amino Acids	11
2-4 Synthesis of $\alpha$ -Amino Acids	17
2-5 Stereoisomerism of $\alpha$ -Amino Acids	26
References	30
<b>3 Peptide Synthesis</b>	<b>32</b>
3-1 Protection of Amino Groups	33
3-2 Protection of Carboxy Functions	39
3-3 Protection of Side-Chain Functions	41
3-4 Activation and Coupling Procedures	45
3-5 Racemization	51
3-6 Peptide Notation	53
3-7 Synthesis of Complex Peptides	54
3-8 Amino Acid Polymers	58
References	64
<b>4 Determining the Covalent Structure of Peptides</b>	<b>66</b>
4-1 Amino Acid Analysis	66
4-2 End-Group Analysis	69
4-3 Determining Peptide Sequences	72
4-4 Specific Cleavage of Peptides	73
4-5 Structure Determination of Proteins	77
4-6 Fingerprinting Peptides	80
<b>5 Conformation of Peptide Chains</b>	<b>82</b>
5-1 Geometry of the Peptide Bond	83
5-2 Interamide Hydrogen Bonds	85
5-3 Secondary Structure in Peptides	86
5-4 Hydrophobic Bonds	91
5-5 The Structure of Myoglobin	93
5-6 Amino Acid Polymers in Solution	95
References	98

<b>6 Some Biological Aspects of Peptide Chemistry</b>	<b>100</b>
6-1 Peptide Hormones	100
6-2 Enzymes	104
6-3 Hemoglobin	105
6-4 Peptides from Microorganisms	112
References	114
<b>Appendix: Separation of Amino Acid and Peptide Mixtures</b>	<b>117</b>
A-1 Solvent-Solvent Partition Methods	117
A-2 Ion-Exchange Chromatography	124
A-3 Electrophoresis	125
A-4 Gel Filtration	128
References	130
Index	131
