

CONTENTS

OUTLOOK

1. Protein Supplies and Prospects: The Problem	1
2. General Outlook for Animal Protein in Food Supplies of Developing Areas	16
3. General Outlook for Milk Proteins	27
4. General Outlook for Edible Fish Protein Concentrates	37
5. General Outlook for Seed Protein Concentrates	52
6. Production of Lysine and Methionine	65

SEED PROTEIN PRODUCTS

7. Cottonseed Protein in Human Foods	75
8. Full-Fat Soybean Flours by Continuous Extrusion Cooking	101
9. Plant Protein Foods in India	112
10. Lipid-Protein Isolates	133
11. Major Seed Proteins and the Concept of Aleurins	148
12. Measurement of the Nutritional Availability of Amino Acids in Foods	159
13. Toxic Substances Associated with Seed Proteins	178
14. Mycotoxin Contamination of Foodstuffs	195
15. Some Approaches to the Elimination of Aflatoxin from Protein Concentrates	216

FUTURE DEVELOPMENTS

16. Better protein Quality in Maize	228
17. Safflower, A Potential Source of Protein for Human Food	243
18. Processing of Bacteria for Production of Protein Concentrates	254
19. Fungi and World Protein Supply	261
20. Microbial Synthesis of Food from Coal-Derived Material	269
Index	281
