

CONTENTS

Chapter 1. PAPER CHROMATOGRAPHY OF AMINO ACIDS AND PEPTIDES	1
General Consideration	1
Two-dimensional separations	3
One-dimensional separations	9
Detection of amino acids	17
Separation of peptides	26
References	38
Chapter 2. HIGH-VOLTAGE PAPER ELECTROPHORESIS	41
Apparatus	41
Separation of amino acids	46
Separation of peptides	55
References	60
Chapter 3. ION-EXCHANGE CHROMATOGRAPHY OF AMINO ACIDS AND PEPTIDES	62
Amino acid analysis by displacement development	66
Amino acid analysis by elution (Moore and Stein)	69
Separation of peptides	101
References	107
Chapter 4. DISULPHIDE BONDS	110
Disulphide interchange reactions	110
Cleavage of disulphide bonds	111
Cleavage by oxidation	113
Cleavage by reduction	115
Cleavage by sulphite	124
References	131
Chapter 5. SELECTIVE CLEAVAGE OF PEPTIDES CHAINS	134
Partial acid hydrolysis	135
Hydrolysis by enzymes	141
Selective cleavage by chemical methods	151
References	159

Chapter 6. N-TERMINAL SEQUENCE DETERMINATION	163
Dinitrophenyl methods of Sanger	163
Column chromatography of DNP-amino acids	170
Paper chromatography of DNP-amino acids	182
Chromatography of DNP-peptides	188
‘DNS’ method of Hartley	189
Phenylthiohydantoin method of Edman	190
Other chemical methods	207
Leucine aminopeptidase	216
References	218
Chapter 7. C-TERMINAL SEQUENCE DETERMINATION	222
Cleavage of C-terminal groups with carboxypeptidase	222
Hydrazinolysis method of Akabori	225
Reduction of C-terminal groups to amino alcohols	229
Other chemical methods	245
References	248
Chapter 8. DIALYSIS AND GEL FILTRATION	250
Dialysis	250
Electrodialysis	256
Gel filtration	258
References	275
Chapter 9. COLUMN CHROMATOGRAPHY OF PROTEINS	278
Adsorption chromatography on calcium phosphate	278
Chromatography of proteins on ion-exchange resins	283
Cellulose ion exchangers	290
Gradient elution	300
References	302
Chapter 10. ZONE ELECTROPHORESIS OF PROTEINS	305
Paper electrophoresis	305
Zone electrophoresis in other supporting media	313
Zone electrophoresis in vertical columns	331
Carrier-free electrophoresis	335
References	337

Chapter 11. MISCELLANEOUS ANALYTICAL METHODS	340
Estimation of protein	340
Determination of nitrogen	346
Estimation of tryptophan in proteins	349
References	351
Chapter 12. SYNTHESIS OF SIMPLE PEPTIDES	353
Introduction	353
General principles	354
Protection of the N-terminal group	355
Protection of the C-terminal group	368
Coupling methods	371
Side-chain protection	385
Side-phase peptide synthesis	387
References	389
Subject index	395
