

CONTENTS

1	Basic Concepts of Protein Purification and Characterization	1
2	Protein Purification: Classical Approaches	19
3	Protein Purification: Affinity Chromatography	45
4	Molecular Weight Determination	64
5	Determination of the Primary Structure of Proteins and Peptides	84
6	Peptide Synthesis	119
7	Chemical Modification: Side-Chain Specific Reagents	132
8	Chemical Modification: Affinity Reagents	184
9	Secondary Structure of Proteins	205
10	Tertiary Structure of Proteins	227
11	Quaternary Structure	275
12	Conformation Changes	295
13	Enzyme Kinetics: A Review	314
14	Two-Substrate Kinetics	332
15	Three-Substrate Kinetics and Related Topics	354
16	Deviations from Linear Kinetics	370
17	Ligand Binding Studies	378
18	Rapid Kinetics	400
19	Use of Isotopes in Enzyme Kinetic Mechanism Analysis	434
20	Effects of pH, Temperature, and Isotopically Labeled Substrates on Enzyme Activity	449
21	Allosteric Models of Enzyme Regulation	461
	Index	491
