

CONTENTS

CHAPTER 1	The Importance of Amino Acid Analysis: Factors To Be Considered in Choosing an Analytical System	1
	I. Introduction	1
	II. Historical Development	1
	III. Accuracy of Amino Acid Analysis	3
	IV. Methods of Amino Acid Analysis	5
	V. Nomenclature and Units	7
	References	8
CHAPTER 2	Hydrolytic Procedures	11
	I. Preparation of Material for Analysis	11
	II. Methods of Hydrolysis: Introduction	12
	III. Acid Hydrolysis	13
	IV. Alkaline Hydrolysis	22
	V. Enzymic Hydrolysis	24
	References	28
CHAPTER 3	The Chromatographic Separation of Amino Acids	31
	I. Starch Columns	31
	II. Resin Columns Eluted with Acid	32
	III. Resin Columns Eluted with Buffers	37
	References	38
CHAPTER 4	Factors Affecting the Separation of Amino Acids on Resin Columns	39
	I. Theory of Chromatographic Separations	39
	II. Composition of the Buffer	43
	III. Resin	43
	IV. Effect of Temperature	49
	V. Effect of Pressure	50
	VI. Dimensions of the Column	51
	VII. Sample Volume	51
	References	52

CHAPTER 5	The Operation of Columns of Ion-Exchange Resin	53
	I. Preparation of Resin	53
	II. Packing the Chromatographic Columns	56
	III. Eluents for Resin Columns	57
	IV. Operation of the Column	63
	References	67
CHAPTER 6	Estimation of the Amino Acids from the Column	69
	I. Reaction of Ninhydrin with Amino Aids	69
	II. Effect of Various Factors on the Reaction	70
	III. Reaction of Ninhydrin with Proline and Hydroxyproline	75
	IV. Ninhydrin Reagent	77
	V. Measurement of the Absorbance	78
	VI. Calculation of Results	78
	References	80
CHAPTER 7	Automatic Amino Acid Analysis	81
	I. Introduction: Analyzers Using Ninhydrin Estimation	81
	II. Analyzers Not Using Ninhydrin Detection	85
	III. Construction and Operation of the Automatic Analyzer	88
	IV. Operation of the Instrument	91
	V. Internal Standards	94
	VI. Computation of the Results	95
	VII. Automatic Computation of the Results	98
	References	100
CHAPTER 8	Accuracy and Sensitivity of Ion-Exchange Resin Methods	103
	I. Accuracy if the Methods	103
	II. Information on Proteins Obtainable from Accurate Analysis	106
	III. Micro- and Ultramicroanalysis	109
	IV. Avoidance of Contamination	113
	V. Choice of Analytical System	116
	References	118
CHAPTER 9	Miscellaneous Application of Ion-Exchange Resin Techniques	119
	I. Estimation of Free Amino Acids in Physiological Fluids	119
	II. Analysis of Foodstuffs	125
	III. Determination of Cystine and Cysteine	127
	IV. Determination of Tryptophan	132
	V. Unusual Amino Acid Groups	133
	References	136

CHAPTER 10	The Estimation of Amino Acids by Paper Chromatography	139
	I. Introduction	139
	II. Factors Influencing the Separation	140
	III. Experimental Procedure	143
	IV. Buffered Papers	145
	V. Ion-Exchange Papers	145
	VI. Quantitative Methods	146
	VII. Discussion	148
	References	148
CHAPTER 11	Analytical Systems Based on Amino Acid Derivatives	151
	I. Introduction	151
	II. Dinitrophenyl Amino Acids	152
	III. Amino Acid Phenylthiohydantions	164
	IV. 1-Dimethylaminonaphthalene-5-sulfonyl Amino Acids	173
	V. Discussion	177
	References	178
CHAPTER 12	Spectrophotometric Methods of Estimation	181
	I. Use of Infrared Spectra	181
	II. Determination of Tyrosine and Tryptophan	182
	References	187
CHAPTER 13	Miscellaneous Procedures of Amino Acid Estimation	189
	I. Introduction	189
	II. Determination of Tryptophan	190
	III. Determination of Hydroxylysine	194
	IV. Determination of Hydroxyproline	195
	V. Determination of Glycine	196
	VI. Determination of Cystine by the Phosphotungstic Acid Reaction	197
	VII. Estimation of Cystine plus Cysteine by the Disulfide Interchange Reaction	198
	References	203
CHAPTER 14	The Use of the Mass Spectrometer in Amino Acid Analysis	205
	I. Introduction	205
	II. Mass Spectra of Amino Acid Esters	207
	III. Determination of Amino Acids in Hydrolyzates	212
	IV. Determination of Amino Acids in Intact Peptides	213
	V. Discussion	216
	References	217

CHAPTER 15	The Determination of Amino Acids by High Voltage Electrophoresis	219
I.	Introduction	219
II.	Apparatus	221
III.	Mobility of the Amino Acids	221
IV.	Composition of the Electrolyte	222
V.	Operational Details	226
VI.	Quantitative Evaluation of the Amino Acids	227
VII.	Discussion	230
	References	231
CHAPTER 16	The Gas Chromatographic Determination of Amino Acids	233
I.	Introduction	233
II.	General Outline of Gas Chromatography	234
III.	Detectors	235
IV.	Choice of a Suitable Derivative	237
V.	Factors Affecting the Performance of the Column	241
VI.	Quantitative Amino Acid Analysis by Gas Chromatography	246
VII.	Use of Other Derivatives	248
VIII.	Discussion	250
	References	250
CHAPTER 17	Future Methods of Amino Acid Determination	253
I.	Development of Present Techniques	253
II.	Future Procedures	255
	References	257
