

# Contents

LIST OF CONTRIBUTORS . . . . .	v
PREFACE . . . . .	vii
CONTENTS OF VOLUME I . . . . .	xi
CONTENTS OF VOLUME III . . . . .	xii
ERRATA . . . . .	xiii

## Chapter 7

### The Conformation of Polypeptide Chains in Proteins

JOHN A. SCHELLMAN AND CHARLOTTE SCHELLMAN

I. Introduction . . . . .	1
II. Possible Conformations of the Polypeptide Chain in Solution . . . . .	5
III. Summary of Results Obtained from Investigations of Synthetic Polypeptides. . . . .	31
IV. Experimental Methods of Determining the Conformation of Proteins . . . . .	51
V. Conclusion . . . . .	127
References . . . . .	128

## Chapter 8

### Interaction of Proteins with Hydrogen Ions and Other Small Ions and Molecules

JACINTO STEINHARDT AND SHERMAN BEYCHOK

I. Introduction . . . . .	140
II. Definitions, Concepts, and Experimental Methods . . . . .	145
III. Prototropic Components and Their Characteristics . . . . .	160
IV. Description of Useful Models . . . . .	173
V. Experimental Results with Individual Proteins and Their Interpretation . . . . .	198
VI. Binding of Small Ions to Proteins . . . . .	249
VII. Combination of Proteins with Un-ionized Molecules . . . . .	276
VIII. Applications of Protein Acid-Base Equilibria . . . . .	283
IX. Problem Areas for Future Investigations . . . . .	293
References . . . . .	296

## Chapter 9

### Interacting Protein Systems

L. W. NICHOL, J. L. BETHUNE, G. KEGELES, AND E. L. HESS

I. Introduction . . . . .	305
II. Methods for Obtaining Values of Characteristic Parameters . . . . .	308

III. The Behavior of Interacting Systems in Transport Experiments . . .	331
IV. Interaction Effects in Other Physicochemical Measurements . . .	389
References . . . . .	396

## *Chapter 10*

### Polyamino Acids as Protein Models

E. KATCHALSKI, M. SELA, H. I. SILMAN, AND A. BERGER

I. Introduction . . . . .	406
II. Synthesis and Chemical Properties of Polyamino Acids . . . . .	409
III. Conformation of Polyamino Acids in the Solid State . . . . .	459
IV. Properties of Polyamino Acids in Solution . . . . .	469
V. Monomolecular Layers . . . . .	513
VI. Polyamino Acids as Substrates for Proteolytic Enzymes . . . . .	519
VII. Polypeptidyl Enzymes and Water-Insoluble Enzymes . . . . .	527
VIII. Antigenicity of Polyamino Acids and Polypeptidyl Proteins . . . . .	535
IX. Polyamino Acids in the Study of the Genetic Code . . . . .	546
X. Interaction of Polyamino Acids with Enzymes and Other Proteins and with Nucleic Acids . . . . .	549
XI. Interaction of Polyamino Acids with Viruses, Bacteria, Fungi, and Blood Cells . . . . .	562
XII. Other Studies of Biological Interest . . . . .	577
XIII. Concluding Remarks . . . . .	580
References . . . . .	581

## *Chapter 11*

### X-Ray Analysis and Protein Structure

RICHARD E. DICKERSON

I. Introduction . . . . .	603
II. Globular Proteins . . . . .	604
III. Fibrous Proteins . . . . .	671
Bibliography. . . . .	768
References . . . . .	769
 AUTHOR INDEX . . . . .	 779
SUBJECT INDEX . . . . .	802
