PREFACE	v
FOREWORD	vii
CONTENTS OF VOLUME I	xiii
CONTENTS OF VOLUME II	xiv
CONTENTS OF VOLUME III	xv
CONTENTS OF VOLUME IV	xvi
CONTENTS OF VOLUME VI	xvii

Chapter I

Introduction

Text

Chapter II

Properties of Metal-Ligand Complexes

A. Introduction	5
B. Stability Constants	7
C. Order and Magnitude of Stability Sequences	9
D. Concentration Effects: pH, pM, pOH	13
E. Transition Metal Bonding	15

Chapter III

Metal-Protein Interactions

A. Stabilities: Metalloproteins and Metal-Protein Complexes	25
B. Functional and Structural Role of the Metal Ion in Metalloproteins and Metalloenzyms	33

Chapter IV

Metal-Binding Groups of Proteins

A. Evidence for Specific Donor Atoms	61
B. Hydrogen Ion Equilibria	87

Chapter V

Spectral Properties of Metalloproteins

A. Absorption Spectra	94
B. Optical Rotation and Circular Dichroism	104
C. Magnetic Properties	120

Chapter VI

Inhibition of Metalloenzymes by Chelating Agents and Metals

A. Inhibition by Chelating Agents	129
B. Inhibition by Metal Ions	143

Chapter VII

Conclusions and Outlook

Text	147
Bibliography	150
General Reviews	169
AUTHOR INDEX	171
SUBJECT INDEX	181
