| Contents of Volume I | xi  |

## **CHAPTER 1. The Chemical Modification of Proteins by Group-Specific and Site-Specific Reagents**

*Alexander N. Glazer*

|  |    |
|--|----|
| I. Introduction . . . . .  | 2  |
| II. Ionization Behavior and Reactivity of Functional Groups in Native Proteins . . . . . | 3  |
| III. "Exposed" and "Buried" Groups . . . . .   | 10 |
| IV. Motility of Protein Structure . . . . .  | 14 |
| V. Modification of Protein Side Chains . . . . .   | 17 |
| VI. Unusually Reactive Groups . . . . .  | 65 |
| VII. Affinity Labeling . . . . .   | 68 |
| VIII. Photochemical Labeling . . . . .   | 76 |
| IX. Sensitized Photooxidation . . . . .  | 80 |
| X. Bifunctional Reagents . . . . .   | 83 |
| XI. Concluding Remarks . . . . .   | 87 |
| References . . . . .   | 88 |

## **CHAPTER 2. The Synthesis of Peptides by Solution Methods with Emphasis on Peptide Hormones**

*Frances M. Finn and Klaus Hofmann*

|  |     |
|--|-----|
| I. Introduction . . . . .                  | 106 |
| II. General Methods of Synthesis . . . . . | 107 |
| III. Protecting Groups . . . . .           | 147 |
| IV. Racemization . . . . .                 | 179 |

|  |     |
|--|-----|
| V. Methods of Purification and Criteria of Homogeneity . . . . . | 193 |
| VI. Biologically Active Peptides and Proteins . . . . .          | 203 |
| VII. Outlook . . . . .   | 236 |
| References . . . . .   | 237 |

## CHAPTER 3. Solid-Phase Peptide Synthesis

*Bruce W. Erickson and R. B. Merrifield*

|  |     |
|--|-----|
| I. Introduction . . . . .  | 257 |
| II. Synthetic Strategies . . . . .   | 262 |
| III. Solid Supports . . . . .  | 269 |
| IV. Attachment to the Solid Support . . . . .                              | 284 |
| V. Protection and Deprotection . . . . .                                   | 312 |
| VI. Neutralization . . . . .   | 347 |
| VII. Activation and Coupling . . . . .                                     | 348 |
| VIII. Cleavage from the Solid Support . . . . .                            | 379 |
| IX. Purification and Characterization . . . . .                            | 387 |
| X. Side Reactions . . . . .  | 397 |
| XI. Automation . . . . .   | 432 |
| XII. Peptides and Proteins Synthesized by the Solid-Phase Method . . . . . | 436 |
| XIII. Other Oligomers Synthesized by the Solid-Phase Method . . . . .      | 453 |
| XIV. Applications of the Solid-Phase Method . . . . .                      | 461 |
| XV. Prospects for the Future . . . . .                                     | 492 |
| References . . . . .   | 493 |
| <br>Author Index   | 529 |
| Subject Index  | 563 |
