

# Contents

List of Contributors	vii
Preface	ix
Contents of Other Volumes	xiii

## **CHAPTER 1. Protein Evolution**

*Russell F. Doolittle*

I. Introduction . . . . .	2
II. Genetic Basis of Amino Acid Replacements . . . . .	5
III. Evolutionary Fixation of Amino Acid Replacements . . . . .	23
IV. Comparing Amino Acid Sequences . . . . .	45
V. Gene Duplication . . . . .	66
VI. The Search for Common Ancestors . . . . .	81
VII Animal Structural Proteins and Other Highly Repetitive Sequences . . . . .	103
VIII. Concluding Remarks . . . . .	109
References . . . . .	111

## **CHAPTER 2. Chromosomal Proteins**

*Robert J. DeLange and Emil L. Smith*

I. General Introduction . . . . .	119
II. Fish Sperm Protamines . . . . .	120
III. Histones . . . . .	134
IV. Protamine-Like Proteins . . . . .	218
V. Nonhistone Chromosomal Proteins . . . . .	221
References . . . . .	225

## **CHAPTER 3. Contractile Proteins of Muscle**

*William F. Harrington*

I. Introduction . . . . .	2	4	6
II. Organization of the Myofibril in Vertebrate Striated Muscle			248

<b>III.</b> The Thick Filaments: Structure and Function . . . . .	<b>258</b>
<b>IV.</b> Aggregation of Myosin and Its Proteolytic Fragments . . . . .	<b>271</b>
<b>V.</b> The Structure of Myosin . . . . .	<b>280</b>
<b>VI.</b> The C-Protein . . . . .	<b>297</b>
<b>VII.</b> Structure of the Thin Filaments . . . . .	<b>298</b>
<b>VIII.</b> The Structure of G-Actin . . . . .	<b>315</b>
<b>IX.</b> The Regulatory Proteins . . . . .	<b>317</b>
<b>X.</b> The M-Line Proteins . . . . .	<b>328</b>
<b>XI.</b> The Z-Line Proteins . . . . .	<b>333</b>
<b>XII.</b> Paramyosin . . . . .	<b>337</b>
<b>XIII.</b> The Mechanism of Muscular Contraction in Striated Muscle . . . . .	<b>345</b>
References . . . . .	<b>393</b>

## CHAPTER 4. The Chemistry and Biology of Collagen

*Paul Bornstein and Wolfe Traub*

<b>I.</b> Introduction . . . . .	<b>412</b>
<b>II.</b> Identification, Distribution, and Function . . . . .	<b>415</b>
<b>III. Procollagen</b> . . . . .	<b>432</b>
<b>IV.</b> Chemical Composition of Collagen . . . . .	<b>450</b>
<b>V.</b> Primary Structure of Collagen . . . . .	<b>462</b>
<b>VI.</b> Covalent Interchain Cross-Links in Collagen . . . . .	<b>495</b>
<b>VII.</b> Molecular Conformation . . . . .	<b>511</b>
<b>VIII.</b> Fibril Structure . . . . .	<b>527</b>
<b>IX.</b> Immunochemistry . . . . .	<b>542</b>
<b>X.</b> Hydroxylation of Peptidyl Proline and Lysine . . . . .	<b>552</b>
<b>XI.</b> Degradation of Collagen by Enzymes from Animal Sources . . . . .	<b>572</b>
<b>XII.</b> Heritable Disorders of Collagen Synthesis . . . . .	<b>591</b>
<b>XIII.</b> Concluding Remarks . . . . .	<b>602</b>
References . . . . .	<b>605</b>
