

CONTENTS

Chapter 1

Introduction	1
I. Fatty Acids	1
II. Triglyceride, Polar Lipids	6

Chapter 2

Extraction of Lipids	11
I. Extraction of Photosynthetic Tissue	14
II. Extraction of Oilseeds	14
III. Extraction of Tiger Prawns	15
IV. Extraction of Coffee Whitener	16
V. Extraction of Wheat Flour	17
VI. Spores, e.g., Wheat Stem Rusts	18
VII. Volatile Fatty Acids From Growth Media and Cells	19

Chapter 3

Thin Layer Chromatography	21
I. Introduction	21
II. Commercial and Home Prepared Plates	24
A. Plain Silica	24
B. Silver Nitrate Impregnated Silica	27
B.1 Fully "Home Made: Plates	28
B.2 Use of Commercial Silica Plates	28
C. Boric Acid Impregnates Silica	29
C.1 Fully: Home Made" Plates	29
C.2 Use of Commercial Plates	30
III. TLC of Lipids on Silica Layers	30
A. Sample Application	30
B. Neutral Lipid Classes	31
C. Polar Lipid Class	33
D. Oxygenated Fatty Acids and TG Containing Then	36
IV. Argentation and Boric Acid TLC	39
A. Argentation TLC	39
A.1 Fatty Acids	39
A.2 Triglycerides	42
B. Boric Acid TLC	42

V. Visualization	44
VI. Quantitative TLC	46
A. TLC Plates – General Principles	46
B. TLC Plates – Secondary Fluorescence	49
C. Preparative TLC	54
D. Flame Ionization Instruments for TLC	55
D.1 Tubular TLC-FID	56
D.2 Chromarods and the Iatroscan	57
Chapter 4	
Gas Liquid Chromatography	65
I. Introduction	65
II. Principles and Practical Considerations	66
III. The Column	69
A. Packed Columns	69
B. Wall Coated Open Tubular (WCOT) Columns	71
IV. Detection	76
V. Quantitation	78
VI. Derivatization	81
A. Esters of Fatty Acid	81
B. 0-Trimethylsilyl Ethers (OTMSi) and Analogues	85
VII. Applications	86
A. Free Fatty Acids	86
A.1 Packed Columns	86
A.2 WCOT Columns	88
B. Fatty Acid Methyl Esters	89
B.1 Packed Columns	90
B.2 WCOT Columns	94
C. Triglycerides, Diglycerides, Monoglycerides	96
C.1 Packed Columns	96
C.2 WCOT Columns	100
D. Sterol and Steryl Esters	109
Chapter 5	
High Performance Liquid Chromatography	113
I. Introduction	113
II. Principles and Practical Considerations	114
III. Detection Systems	117
A. Optical Systems	117
B. “Universal” Detectors	117

B.1	The Pye Unicam LCM2	117
B.2	Evaporative, Light Scattering Detector	119
B.3	Tracor 945 Flame Ionization Detector	123
IV.	Applications	126
A.	Neutral Lipid Classes	126
B.	UV Derivatives of FFA	128
C.	Triglycerides	129
D.	Polar Lipid Classes	137
E.	Argentation Chromatography	139
F.	An Alternative to Argentation Chromatography	147
F.1	Preparation of the Epoxide Derivative of TG	150
	Conclusion	153
