CHAPTER I. Methods for Obtaining the Infrared Spectra of Cellulose and Related Materials	1
Investigation of Unchanged Fibrous Material	18
The Suspension Method	20
The Solid Immersion Media Method	20
Production of Thin Fiber Films Without Use of an Immersion Medium	23
Production of Infrared Spectra of Cellulose From Alkaline Aqueous Solutions	31
Production of Thin Films of Water-Soluble compounds from Their Aqueous Solutions	31
CHAPTER II. Model Cellulose Compounds. Unmodified Celluloses	35
Monosaccharides	37
Disaccharides	51
Polysaccharides	53
Cellulose from One-Year-Old Plants	57
Cellulose from Young Wood Shoots	63
Cellulose from Woods of Various Ages	68
Samples of Technical Cellulose	71
CHAPTER III. Hydrocellulose. Products of the Partial Hydrolysis of Cellulose	73
Cellulose Regenerated After Treatment with Alkali of Various Concentrations	80
Viscose Fibers	86
Effect of Hydrogen Bonds on the Structure of Cellulose	86
Alkaline Cellulose	89
Products of the Partial Hydrolysis of Cellulose	90
CHAPTER IV. Cellulose Esters and Ethers	93
Cellulose Acetates Produced under Homogeneous Conditions of Acetylation and Partial Hydrolysis	100
Cellulose Acetates Produced under Heterogeneous Conditions of Acetylation and Partial Hydrolysis	103
Comparison of Spectral Data with the Results of Viscometric Analyses of Cellulose Acetates	105
Acetylcellulose Fibers with Different Acetyl Group Contents	107
Special Features of the Spectra of Ethers and Esters of Cellulose	111
CHAPTER V. Oxidation Products of Cellulose. Salts of Oxidation Products of Cellulose	117
Monocarboxycellulose	119
Dialdehydocellulose	122
Dialdehydocellulose Oxidized by Nitrogen Oxides	123
Dicarboxycellulose	124
Dialcoholcellulose	124
Salts of Oxidation Products of Cellulose	125
Salts of Cellulose Oxidation Products with Inorganic Cations	127
Salts of Cellulose Oxidation Products with Organic Cations	129
CHAPTER VI. New Types of Cellulose Derivative	131
Esters of Cellulose with Phosphorus-Containing Acids	132
Esters of Cellulose with Chlorinated Aliphatic Acids	137
Stable Xanthate Derivatives of Cellulose	140
Investigation of the Products of Thermal Decomposition of Cellulose Methylxanthate	145
Cellulose Compounds Containing New Functional Groups	148
Graft Copolymers of Cellulose with Poly-2-netgk-5-vinylpyridine	150
Graft Copolymers of Cellulose and Carbon Chain Polymers, Obtained by Initiating The Graft Polymerization with Pentavalent Vanadium Compounds	157

Products of the Ion-Exchange of Graft Copolymers of Cellulose and Polyacrylhydroxamic Acid with Ions of Fe ³⁺ and Cu ²⁺	160
CHAPTER VII. The Possibilities of the Infrared Spectroscopic Method for Investigation of	
The Properties of Cellulose and Its Derivatives	167
The 2000-4000 cm ⁻¹ Region	167
The 1500-2000 cm ⁻¹ Region	174
The 1200-1500 cm ⁻¹ Region	167
The 950-1200 cm ⁻¹ Region	181
The 700-950 cm ⁻¹ Region	182
The 400-700 cm ⁻¹ Region	184
APPENDICES	187
Appendix I. Spectra of Mono-, Di-, and Polysaccharides and their Derivatives, and Spectra of Polyhydric Alcohols	189
Appendix II. Spectra of Unmodified Celluloses	219
Appendix III. Spectra of Celluloses Regenerated After Treatment with Aqueous Alkali Of Various Concentrations. Spectra of Viscose Silk and of Alkaline Cellulose	235
Appendix IV. Spectra of Products of Partial Hydrolysis and Ethanolysis of Cellulose	244
Appendix V. Spectra of Cellulose Ethers and Esters	249
Appendix VI. Spectra of Oxidation Products of Cellulose	263
Appendix VII. Spectra of Salts of Cellulose Oxidation Products	273
Appendix VIII. Spectra of New Types of Cellulose Derivatives and Modified Celluloses	277
Appendix IX. Characteristic Vibration Frequencies of Groups and Bonds in the Molecules of Cellulose and Its Derivatives	304
LITERATURE CITED	325
