

## CONTENTS

<b>1</b>	Monosaccharides: geometry and dynamics	1
1.1	Introduction	1
1.2	Methods for determination of monosaccharide geometry	9
1.3	Shapes of acyclic carbohydrates	17
1.4	Shapes of carbohydrate rings	18
1.5	Detailed factors that determine the shapes of sugar rings	28
1.6	Likely shapes for monosaccharides	31
1.7	Effects of condensed phases (solvents and crystals)	33
1.8	Dynamic behavior of monosaccharides	36
	References	41
	Software	46
<b>2</b>	Chemical synthesis of monosaccharides	47
2.1	The asymmetric synthesis of monosaccharides from achiral starting materials	47
2.2	Asymmetric synthesis of monosaccharides via chemical homologation and degradation	64
2.3	Monosaccharide mimetics and pseudo sugars	75
2.4	Recent methodological developments in the chemical modification and manipulation of monosaccharide derivatives	91
	References	104
<b>3</b>	Carbohydrate sulphates	107
3.1	Introduction	107
3.2	Natural occurrence and biological role	107
3.3	Chemical synthesis and modification	128
3.4	Chemical stability	134
3.5	Methods of analysis	137
3.6	Conformational effects of sulphation	140
	References	141
<b>4</b>	Conjugation of monosaccharides – synthesis of glycosidic linkages in glycosides, oligosaccharides and polysaccharides	150
4.1	Introduction	150
4.2	Chemical synthesis of O-glycosides	151
4.3	Chemical synthesis of S-, N- and C-glycosides	172
4.4	Enzymatic synthesis of O-glycosides	178
	References	182

<b>5</b>	<b>Chemistry of glycopeptides</b>	<b>187</b>
5.1	Introduction	187
5.2	Saccharide-peptide linkages of natural glycoproteins	188
5.3	problems of isolation and structure elucidation of glycoproteins	190
5.4	Synthesis of glycosyl amino acids	192
5.5	Synthesis of oligosaccharides and glycopeptides	207
5.6	Solid-phase synthesis of glycopeptides	216
5.7	Conclusions	221
	References	221
<b>6</b>	<b>Oligosaccharide geometry and dynamics</b>	<b>228</b>
6.1	Introduction	228
6.2	Experimental characterization of oligosaccharide conformations	232
6.3	Disaccharide energetics	237
6.5	Hydration of oligosaccharides	247
6.6	Conformational free energies	251
6.7	Conclusions	254
	References	254
<b>7</b>	<b>Shapes and interactions of polysaccharide chains</b>	<b>258</b>
7.1	Introduction	258
7.2	Ordered structures of polysaccharides	259
7.3	Secondary and tertiary of polysaccharides in solutions and gels	277
	References	290
<b>8</b>	<b>Chemistry of polysaccharide modification and degradation</b>	<b>294</b>
8.1	Introduction	294
8.2	Non-selective chemical modifications	295
8.3	Selective chemical modifications	301
8.4	Modification of carbonyl functions	306
8.5	Modification amines	308
8.6	Polysaccharides degradations	309
	References	313
<b>9</b>	<b>Carbohydrate – protein interactions</b>	<b>319</b>
9.1	General features	319
9.2	Basis of structural specificity	322
9.3	Examples	324
9.4	Enzymes	326
	References	328
