

## CONTENTS

1	Introduction	3
2	Elastomeric Linings and Coatings	3
	2.1 Factory Processing	4
	2.2 Site Processing	4
	2.3 Pipe Lining	5
3	Plastic Sheet And Tubing	5
	3.1 Fabrication	5
	3.2 Adhesion	6
	3.3 Resinous Materials	6
4	Chemical Resistance Of Individual Elastomers	6
	4.1 Soft Natural Rubber	7
	4.2 Natural Rubber-Ebonites	7
	4.3 Styrene Butadiene Rubber (SBR)	7
	4.4 Polychloroprene	7
	4.5 Isoprene Isobutylene Rubber (Butyl Rubber)	8
	4.6 Chlorosulphonated Polyethylene	8
	4.7 Acrylonitrile Butadiene Rubber (Nitrile Rubber)	9
	4.8 Ethylene Propylene Diene Terpolymer (EPDM)	9
	4.9 Fluoroelastomers	9
	4.10Silicone Rubbers	9
5	Chemical Resistance Of Individual Plastics	10
	5.1 Plasticised Polyvinyl Chloride (PVC)	10
	5.2 Unplasticised PVC (UPVC)	10
	5.3 Polyethylene (PE and HDPE)	10
	5.4 Polypropylene (PP)	11
	5.5 Fluoropolymers	11
6	Fibre Reinforced Resins	12
	6.1 Reinforced Polyester Resin	12
	6.2 Reinforced Vinyl Ester Resins	12
	6.3 Flake Glass Coatings	13
	6.4 Reinforced Furane Resin	13
7	Mortars And Screeds	13
	7.1 Cement Modifying Emulsions	13
	7.2 Cement Modifying Resins	13
	7.3 Resins for Mortars and Toppings	14
8	Polymeric Materials and Mortars, Toppings And Coatings	14

8.1 Epoxy Resins	14
8.2 Polyester Resins	15
8.3 Vinyl Ester Resins	15
8.4 Furane Resins	15
8.5 Polyurethane Resins	15
8.6 Phenolic Resins	16
9 Conclusion	16
References and Abstracts	17
Index	95
