

CONTENTS

CROSS-LINKING, STRUCTURE, AND DEGRADATION:**MOLECULAR ARCHITECTURE AND PROPERTIES**

1. Cross-Linking and Structure of Polymer Networks	2
2. Intramolecular Reaction: Effects on Network Formation and Properties	28
3. Selective Quenching of Large-Scale Molecular Motions by Cross-Linking in the Strained State	48
4. Rubber Elasticity Modulus of Interpenetrating Heteropolymer Networks	59
5. Star-Branched Nylon 6: Effects of Branching and Cross-Linking on Polymer Properties	66
6. Networks Formation and Degradation in Urethane and Melamine – Formaldehyde - Cross Linked Coatings	77
7. Effect of Ionizing Radiation on an Epoxy Structural Adhesive	93
8. Frequency-Dependent Dielectric Analysis: Monitoring the Chemistry and Rheology of Thermosets During Cure	100
9. Performance Characteristics of the Fluorescence Optrode Cure Sensor	113

DEFORMATION, FATIGUE, AND FRACTURE:**MECHANICAL PROPERTIES OF CROSS-LINKED POLYMERS**

10. Deformation Kinetics of Cross-Linking Polymers	124
11. Plastic Deformation in Epoxy Resins	136
12. Fractoemission from Epoxy and Epoxy Composites	145
13. Fatigue Behavior of Acrylic Interpenetrating Polymer Networks	169
14. Properties of Epoxy Resins Cured with Ring-Alkylated m-Phenylene Diamines	182
15. Cross-Linking of an Epoxy with a Mixed Amine as a Function of Stoichiometry: Dynamic Mechanical Spectroscopy Studies	199
16. Thermal Stress Development in Thick Epoxy Coatings	221
17. Recycling of Cured Epoxy Resins	237
18. Semiinterpenetrating Networks Based on Triazine Thermoset and N-Alkylamide Thermoplastics	244
19. Development of Multiphase Morphology in Sequential Interpenetrating Polymer Networks	269
20. Polyurethane – Acrylic Coatings: Interpenetrating Polymer Networks	297
21. Ionomer Interpenetrating Polymer Network Coatings from Polyurethane and Vinyl Chloride Copolymer	311
22. Liquid Crystalline Oligoester Diols as Thermoset Coatings Binders	324
23. Synthesis of Cross-Linkable Heterogeneous Oligoester Diols by Direct Esterification with p-Hydroxybenzoic Acid: Use in Coatings Binders	335

24. Benzocyclobutene in Polymer Synthesis: Novel Cross-Linking Systems Derived from a Bisbenzocyclobutene and Bismaleimides, Dicyanates, and Bisphenylacetylene	349
25. Characterization of Bisbenzocyclobutene High-Temperature Resin and Bisbenzocyclobutene Blended with a Compatible Bismaleimide Resin	366
26. Carbon-13 NMR Investigation of the Oligomerization of Bismaleimidodiphenyl Methane with Diallyl Bisphenol A	379
27. Characterization of Cobalt(II) Chloride-Modified Condensation Polyimide Films: Properties Before and After Solvent Extraction	395
28. Chain Cross-Linking Photopolymerization of Tetraethyleneglycol Diacrylate: Thermal and Mechanical Analysis	409
29. Structure and Properties of Polydimethacrylates: Dental Applications	427
30. Monomer Interaction: Effects on Polymer Cure	439
31. Amide-Blocked Aldehyde-Functional Monomers: Synthesis and Chemistry	453
32. Amide-Blocked Aldehyde-Functional Monomers: Cross-Linkable Substrate-Reactive Copolymers	467
