

## CONTENTS

<b>1. ACETOGENINS</b>	<b>1</b>
a. Flavonoids	1
Introduction	1
Isolation of hesperidin from orange peel	8
Acidic degradation of hesperidin	11
Isolation of naringin from grapefruit peel	13
Alkaline degradation of naringin	15
Color changes of anthocyanins at various pH values	17
Paper chromatography of flavonoids	19
Questions	22
Recommended books	22
b. Lipids	22
Introduction	22
Isolation of trimyristin and myristicin from nutmeg	25
Preparation of azelaic acid from castor oil	28
Formation of n-heptaldehyde and undecenoic acid from castor oil	30
Ozonization of methyl oleate	31
Preparation of urea inclusion compounds	33
Gas-liquid chromatography of methyl esters of fatty acids	37
Thin-layer chromatography of fatty acids	40
Questions	40
Recommended books	42
c. Lignans	42
Introduction	42
Isolation of sesamin and sesamol from sesame oil	45
Questions	48
Recommended books	48

<b>2. CARBOHYDRATES</b>	<b>56</b>
a. Mono- and oligosaccharides	56
Introduction	56
Isolation of D-mannoheptulose from avocado	65
x-D-Glucosamine from crustacean shells	67
Chromatographic separation of carbohydrates	69
Gas-liquid chromatography of carbohydrates	71
Thin-layer chromatography of carbohydrates	74
Questions	76
Recommended books	76
b. Polysaccharides	77
Introduction	77
Isolation of amylopectin and amylose from potato starch	81
Isolation of wood cellulose	85
Questions	87
Recommended books	88
<b>3 ISOPRENOIDS</b>	<b>89</b>
a. Carotenoids	89
Introduction	89
Isolation of capsanthin from paprika	93
Isolation of lycopene from tomatoes	96
Determination of B-carotene and chlorophylls in plants	99
Questions	102
Recommended books	102
b. Steroids	103
Introduction	103
Isolation of stigmasterol from soybean oil	111
Degradation of stigmasterol	114
Isolation of hecogenin from agaves its transformation to tigogenin and rockogenin	117
Preparation of $\Delta^5$ -cholesten-3-one and $\Delta^4$ -cholesten-3-one from cholesterol	120
Preparation of vitamin D <sub>2</sub> and its separation by thin-layer chromatography	125
Determination of sterols by digitonin	128
Gas-liquid chromatography of steroids	131
Thin-layer chromatography of sterols and stanols on silica impregnated with silver nitrate	134
Questions	136
Recommended books	137

c.	Terpenoids	137
	Introduction	137
	Conversion of D-limonene to L-carvone and carvacrol	151
	Transformation of $\alpha$ -pinene to camphor	155
	Column chromatography of essential oils	159
	Separation, identification and microreactions of essential oil constituents by thin-layer chromatography	161
	Preparation of abietic acid from wood rosin, and its dehydrogenation to retene	167
	Conversion of betulin to allo- and oxyallobetulin	170
	Isolation of cerin and friedelin from cork	174
	Questions	176
	Recommended books	177
<b>4.</b>	<b>NITROGENOUS</b>	<b>178</b>
a.	Alkaloids	178
	Introduction	178
	Isolation of caffeine from tea	182
	Isolation of piperine from black pepper	185
	Degradation of piperine	187
	Isolation of strychnine and brucine from the seeds of <i>Strychnos nux vomica</i>	189
	Synthesis of mescaline	192
	Gas chromatography of alkaloids	196
	Thin-layer chromatography of opium alkaloids	198
	Questions	200
	Recommended books	202
b.	Amino acids	202
	Introduction	202
	Isolation of glutamine from red beet	207
	Preparation of D-tyrosine from L-tyrosine	211
	Synthesis of DL-B-phenylalanine	214
	Preparation of glycylglycine by mixed carboxylic-carbonic acid anhydride method	218
	Gas-liquid chromatography of amino acids	222
	Test tube and glass rod thin-layer chromatography of amino acids	225
	Thin-layer chromatography of carbobenzoxy-peptides	227
	Questions	229
	Recommended books	229

c. Nucleic acids	229
Introduction	229
Isolation of soluble ribonucleic acid from baker's yeast	234
Preparation of thymidine 3-phosphate	237
Chemical and enzymatic preparation of cyclic nucleotides	240
Ion-exchange thin-layer chromatography of nucleotides	243
Questions	246
Recommended books	246
d. Porphyrins	247
Introduction	247
Isolation of hemin from blood	252
Degradation of hemin	254
Thin-layer chromatography of plant pigments	258
Questions	260
Recommended books	260
e. Proteins	260
Introduction	260
Isolation of lysozyme from albumen	263
Isolation and separation of proteins	266
Thin-layer chromatography of proteins	267
Questions	270
Recommended books	270
f. Pteridines	270
Introduction	270
Isolation of pteridines from the fruit fly, <i>Drosophila melanogaster</i>	273
Synthesis of pteridines	277
Thin-layer chromatography of pteridines	280
Questions	282
Recommended books	282
Bibliography	283
Subject Index	285
Index of Chemical Compounds	291
