

CONTENTS

PART I

1. THE SCOPE. HIGHLIGHTS ON THE HISTORICAL DEVELOPMENT	3
2. ISOLATION OF NATURAL MACROMOLECULES. CRITERIA OF PURITY AND NATIVITY	12
3. THE SIZE, SHAPE, AND HYDRATION OF MACROMOLECULES	41
4. VISCOSITY OF SOLUTIONS OF MACROMOLECULAR SUBSTANCES	75
5. THE CHEMICAL STRUCTURE OF MACROMOLECULES	92

PART II

6. RUBBER AND SIMILAR POLYISOPRENES	115
7. POLYSACCHARIDES. CELLULOSE AND ITS DERIVATIVES	125
8. STARCH AND GLYCOGEN	142
9. THE PECTINS	155
10. GUMS AND MUCILAGES. SEAWEED POLYSACCHARIDES	162
11. LINEAR POLYSACCHARIDES OF ANIMAL ORIGIN	171
12. THE STRUCTURE AND CONFIGURATION OF NATIVE AND DENATURED PROTEINS	183
13. ALBUMINS AND GLOBULINS IN ANIMALS AND PLANTS	204
14. THE HEMOGLOBIN AND OTHER RESPIRATORY PROTEINS	226
15. ENZYMES, AND ENZYMIC ACTIVITY	236
16. PROTEIN HORMONES	254
17. THE FIBROUS STRUCTURAL PROTEINS	265
18. NUCLEOPROTEINS, HISTONES, PROTAMINES, AND RESIDUAL PROTEINS	288
19. THE NUCLEIC ACIDS	299

PART III

20. VIRUSES AND PHAGES	317
21. CELLULAR INGREDIENTS	335
22. RECENT IDEAS ON BIOLOGICAL REPLICATION	351
23. MACROMOLECULES IN BLOOD	365
24. ABNORMAL PROTEINS IN DISEASES	382
25. THE PROBLEM OF MALIGNANT GROWTH	394
26. MACROMOLECULES IN CONNECTIVE TISSUE	410
27. MACROMOLECULAR REACTIONS IN MUSCLE AND NERVE TISSUES	421
28. CONCLUDING REMARKS ABOUT THE SYNTHESIS OF MACROMOLECULES AND ORIGIN OF LIFE	434

AUTHOR-INDEX	442
SUBJECT-INDEX	456
