

CONTENTS

150 Years of Plastics Degradation	1
Fundamental Aspects of Polymer Degradation	14
Preservation of Natural Macromolecules	32
Oriental Lacquer: A Natural Polymer	47
Stability and Function of Coatings Used in Conservation	62
Textile Conservation	82
Degradation and Conservation of Cellulosics and their Esters	108
The Degradation of Cellulose Triacetate by Nuclear Magnetic Resonance Spectroscopy and Molecular Modelling	125
Investigation of the Archival Stability of Cellulose Triacetate Film: The Effect of Additives to CTA Support	138
Film Storage	151
Paper Conservation: Some Polymeric Aspects	159
Early Advances in the Use of Acrylic Resins for the Conservation of Antiquities	184
Action of Light on Dyed and Pigmented Polymers	193
Subject Index	214
