

CONTENTS

1. Ring-Opening Polymerization: Introduction	1
2. Anionic Polymerization of Cyclosiloxanes with Cryptates as Counterions	23
3. Anionic Polymerization of Ethylene Oxide with Lithium Catalysts: Solution Properties of Styrene-Ethylene Oxide Block Polymers	37
4. Free Radical Ring-Opening Polymerization	47
5. Mechanism of N-Carboxy Anhydride Polymerization	67
6. Ring-Opening Polymerization in the Synthesis of Block Copolymers	87
7. Metal-Alcoholate Initiators: Sources of Questions and Answers in Ring-Opening Polymerization of Heterocyclic Monomers	97
8. Solvent and Substituent Effects in the Anionic Polymerization of α , α -Disubstituted B-Propiolactones	105
9. Structure-Reactivity Relationships in Ring-Opening Polymerization	117
10. Control of Ring-Opening Polymerization with Metalloporphyrin Catalysts: Mechanistic Aspects	137
11. Anionic Ring-Opening Polymerization of Octamethylcyclotetrasiloxane in the Presence of 1,3-Bis (aminopropyl) 1,1,3,3-tetramethyldisiloxane	147
12. An Improved Process for ϵ -Caprolactone-Containing Block Polymers	161
12. Organolithium	
13. Polymerization of ϵ -Caprolactone	175
14. Cationic Heterocyclic Polymerization	183
15. Thermally or Photochemically Induced Cationic Polymerization	195
16. Polymerization of Substituted Oxiranes, Epoxy Aldehydes, and Derived Oxacyclic Monomers	205
17. Polymerization and Copolymerization of N-Alkylaziridines	219
18. Block Copolymers of Poly (ethylene glycol) and Poly (N-isovalerylethynimine): Kinetics of Initiation	231
19. Synthesis and Applications of Polysiloxane Macromers	245
20. Homopolymerization of Epoxides in the Presence of Fluorinated Carbon Acids: Catalysts Transformations	263
21. Mechanism of Ring-Opening Polymerization of Bicycloalkenes by Metathesis Catalysts	275
22. Electrophilic Ring-Opening Polymerization of New Cyclic Trivalent Phosphorus Compounds: A Novel Mechanism of Ionic Polymerization	293
23. Synthesis and Polymerization of Atom-Bridged Bicyclic Acetals and Ortho Esters: A Dioxacarbenium Ion Mechanism for Ortho Ester Polymerization	313
24. Radiation-Induced Cationic Polymerization of Limonene Oxide, α -Pinene Oxide, and B-Pinene Oxide	335

25. Cationic Ring-Opening Polymerization of Epichlorhydrin in the Presence of Ethylene Glycol	361
26. Lactone Polymerization: Pivalolactone and Related Lactones	373
