

CONTENTS

PART I POLYMER STRUCTURE AND PROPERTIES

1. Basic principles	3
1.1 Introduction and historical development	3
1.2 Definitions	7
1.3 Polymerization processes	12
1.4 Step-reaction polymerization	14
1.5 Chain-reaction polymerization	16
1.7 Nomenclature	18
1.8 Industrial polymers	29
References	35
Review exercises	37
2. Molecular weight and polymer solutions	40
2.1 Number average and weight average molecular weight	40
2.2 Polymer solutions	43
2.3 Measurement of number average molecular weight	48
2.4 Measurement of weight average molecular weight	53
2.5 Viscometry	57
2.6 Molecular weight distribution	59
References	66
Review exercises	67
3. Chemical structure and polymer morphology	70
3.1 Introduction	70
3.2 Molecular weight and intermolecular forces	71
3.3 The amorphous state – rheology	72
3.4 Glass transition temperature	80
3.5 Stereochemistry	85
3.6 Crystallinity	91
3.7 Liquid crystallinity	95
3.8 Chemical crosslinking	98
3.9 Physical crosslinking	99
3.10 Polymer blends	100
References	104
Review exercises	107

4. Chemical structure and polymer properties	110
4.1 Introduction	110
4.2 Fabrication methods	110
4.3 Mechanical properties	114
4.4 Thermal stability	122
4.5 Flammability and flame resistance	126
4.6 Chemical resistance	128
4.7 Degradability	313
4.8 Electrical conductivity	134
4.9 Additives	137
References	141
Review exercises	144
5. Evaluation, characterization, and analysis of polymers	146
5.1 Introduction	146
5.2 Chemical methods of analysis	147
5.3 Spectroscopic methods of analysis	148
5.4 X-ray, electron, and neutron scattering	158
5.5 Characterization and analysis of polymer surfaces	160
5.6 Thermal analysis	167
5.7 Measurement of mechanical properties	176
5.8 Evaluation of chemical resistance	178
5.9 Evaluation of chemical properties	178
References	180
Review exercises	183
PART II VINYL POLYMERS	
6. Free radical vinyl polymerization	189
6.1 Introduction	189
6.2 Free radical initiators	191
6.3 Techniques of free radical polymerization	196
6.4 Kinetics and mechanism of polymerization	199
6.5 Stereochemistry of polymerization	209
6.6 Polymerization of dienes	212
6.7 Monomer reactivity	216
6.8 Copolymerization	221
References	229
Review exercises	231

7. Vinyl polymerization with ionic and group transfer initiators	234
7.1 Introduction	234
7.2 Cationic polymerization	235
7.3 Anionic polymerization	250
7.4 Group transfer polymerization	262
References	266
Review exercises	268
8. Vinyl polymerization with complex coordination catalysts	271
8.1 Introduction	271
8.2 Ziegler-Natta catalysts	273
8.3 Mechanism and reactivity in Ziegler-Natta polymerization	276
8.4 Stereochemistry of Ziegler-Natta polymerization	281
8.5 Polymerization of dienes with Ziegler-Natta catalysts	283
8.6 Metathesis polymerization	285
8.7 Ziegler-Natta copolymerization	289
8.8 Supported metal oxide catalysts	291
8.9 Alfin catalysts	292
References	293
Review exercises	294
9. Reactions vinyl polymers	296
9.1 Introduction	296
9.2 Functional group reactions	297
9.3 Ring-forming reactions	301
9.4 Crosslinking	303
9.5 Block and graft copolymer formation	312
9.6 Polymer degradation	317
References	321
Review exercises	323
PART III NONVINYL POLYMERS	
10. Step-reaction and ring-opening polymerization	329
10.1 Introduction	329
10.2 Step-reaction polymerization – kinetics	329
10.3 Stoichiometric imbalance	335
10.4 Molecular weight distribution	337
10.5 Network step polymerization	339
10.6 Step-reaction copolymerization	342
10.7 Step polymerization techniques	343

10.8 Ring-opening polymerization	346
References	349
Review exercises	350
11. Polyethers, polysulfides, and related polymers	352
11.1 Introduction	352
11.2 Preparation of polyethers by chain-reaction and ring-opening polymerization	352
11.3 Preparation of polyethers by step-reaction polymerization	368
11.4 Polysulfides, poly(alkylene polysulfide)s, and polysulfones	379
References	385
Review exercises	388
12. Polyesters	392
12.1 Introduction	392
12.2 Linear polyesters	393
12.3 Crosslinked polyesters	410
References	415
Review exercises	417
13. Polyamides and related polymers	421
13.1 Introduction	421
13.2 Polyamides	424
13.3 Polymers related to polyamides	440
References	462
Review exercises	465
14. Phenol-, urea-, and melamine – formaldehyde polymers	470
14.1 Introduction	470
14.2 Phenol-formaldehyde polymers: resoles	471
14.3 Phenol-formaldehyde polymers: novolacs	475
14.4 Chemical modifications of phenolic resins	478
14.5 Urea-formaldehyde polymers	481
14.6 Melamine-formaldehyde polymers	483
References	484
Review exercises	485

15. Inorganic and partially inorganic polymers	487
15.1 Introduction	487
15.2 Poly (sulfur nitride)	488
15.3 Polysiloxanes	489
15.4 Polysilanes	493
15.5 Phosphonitrilic polymers	494
15.6 Carborane polymers	497
15.7 Organometallic polymers	499
15.8 Coordination polymers	502
References	506
Review exercises	509
16. Miscellaneous organic polymers	511
16.1 Introduction	511
16.2 Miscellaneous unsaturated polymers	511
16.3 Miscellaneous heterocyclic polymers	517
16.4 Poly (p-phenylene) and poly (p-xylylene)	523
16.5 Friedel-Crafts polymers	526
16.6 Cycloaddition polymerization	527
16.7 Ring-opening polymerization of strained cycloalkanes	533
16.8 Polyanhydrides	534
16.9 Polyamines	535
16.10 Charge-transfer polymers	539
16.11 Ionic polymers	541
References	544
Review exercises	547
17. Natural polymers	553
17.1 Introduction	553
17.2 Miscellaneous natural polymers	554
17.3 Polysaccharides	561
17.4 Proteins	571
17.5 Nucleic acids	585
17.6 Conclusion	595
References	595
Review exercises	598
Appendix A Commonly used polymer abbreviations	601
Appendix B Polymer literature	603
Appendix C Sources of laboratory experiments in polymer chemistry	611
Index	619
