

CONTENTS

Preface	v
List Contributors	ix
1. Computer Analysis of X-ray Diffraction Patterns	1
2. The Determination of the Structures of Aromatic Polyesters from their Wide-angle X-ray Diffraction Patterns	39
3. Transmission Electron Microscopy of Polymers	79
4. Neutron Scattering by Crystalline Polymers: Molecular Conformations and Interpretation	125
5. The Ability of Small-angle X-ray Scattering to Distinguish between Morphological Models of Crystalline Polymers	181
6. Long-wavelength X-ray Scattering to study Crystal Morphology	229
7. Chain-folding in Polymer Crystals: Evidence from Microscopy and Calorimetry of Poly (ethylene oxide)	261
Index	309
