

CONTENTS

1 Introduction	1
1.1 Synthesis of Macromolecular Compounds	1
1.2 Structure of Macromolecular Compounds	13
1.3 The Shape of Macromolecules	18
1.4 States of Aggregation and Properties of Macromolecular Compounds	19
1.5 Literature on Macromolecular Compounds	29
2 General Methods of Polymer Chemistry	32
2.1 Preparation of Macromolecular Compounds	32
2.2 Isolation and Purification of Polymers	54
2.3 Characterization of Polymers	58
2.4 Processing of Polymers	99
3 Synthesis of Macromolecular Compounds by Addition Polymerization	104
3.1 Free Radical Homopolymerization	104
3.2 Ionic Homopolymerization	136
3.3 Copolymerization	175
4 Synthesis of Macromolecular Compounds by Polycondensation and Hydrogen Transfer Polymerization	197
4.1 Polycondensation	197
4.2 Hydrogen Transfer Polymerization	240
5. Reactions of macromolecular Compounds	253
5.1 Chemical Conversions on Macromolecular Compounds	253
5.2 Ion Exchangers	261
5.3 Degradation of Macromolecular Compounds	266
Subject Index	275
