

CONTENTS

Part I introduction to Polymer Synthesis technique	
Chapter 1 Polymerization Mechanisms	3
Chapter 2 Polymerization Conditions	27
Chapter 3 Materials and Their Purification	38
Chapter 4 Experimental Methods and Apparatus	51
Chapter 5 Following the Course of Polymerization	82
Part II Introduction to Polymer Characterization Techniques	
Chapter 6 Preliminary Evaluation of Polymer Properties	99
Chapter 7 Molecular Weight and its Distribution	121
Chapter 8 Polymer Morphology	179
Chapter 9 Thermal Properties	216
Chapter 10 Structure-Property Relationships	263
Part III Experiments	
A Synthesis Experiments	327
B Experiments Measuring Molecular Weight and Distribution	362
C Morphology and thermal-Property Experiments	410
D Experiments on Structure-Property Relations	451
Appendixes	
I Standard Polymer Samples	493
II Properties of Selected Polymers	504
III Properties of Monomers and Solvents Used in the Experiments	506
IV Errors and the Statistical Treatment of Data	510
Index	525
