

CONTENTS

I. Introduction	1
1. Polymer Characterization from Solubility	13
2. Evaluation of Molecular Weight and Solution Dimensions: Measurement of the Dilute-Solution Viscosity of Polystyrene.	25
3. Determination of Some of the Factors Affecting Spherulitic Growth: The Crystallization of Poly (Ethylene Adipate)	45
4. Kinetics of Condensation Polymerization: Preparation of a Polyester.	57
5. Determination of the Heat of Polymerization: The Preparation of Poly (Methyl Methacrylate)	69
6. Suspension Polymerization: The Preparation of Polystyrene.	83
7. Emulsion Polymerization: Preparation of Polymers and Copolymers of Styrene, Butadiene, and Acrylonitrile.	89
8. Low Temperature Condensation Polymerization.	101
9. Preparation of Urethane Foams: A Structure-Property Correlation.	115
10. Preparation of Some Inorganic High Polymers.	125
11. Macromolecules as Chemical Reactants: The Preparation of Several Esters of Cellulose.	137
12. Polymer Purification Techniques.	149
13. Formation of a Thermosetting Resin: Preparation of Either a Urea-formaldehyde or a Melamine-formaldehyde Resin.	155
14. Preparation of a Condensation-Polymerized Elastomer: Synthesis of Poly(Ethylene Tetrasulfide).	165
15. The Fractionation of a High Polymer.	173
16. Kinetics of Addition Polymerization: The Rate of Decomposition of 2,2-Azo-Bis-Isobutyronitrile.	181
17. Kinetics of Addition Polymerization: A Dilatometric Study of the Rate of Polymerization of Styrene.	191
18. Kinetics of Addition Polymerization: A Study in Chain Transfer	201
19. Copolymerization: Determination of Reactivity Ratios.	217
20. Ionic Polymerization: Anionically Induced Polymerization of Methyl Methacrylate; Tacticity	229
21. Polymer Degradation: A Temperature-Decomposition Profile from Thermogravimetric Analysis.	247
22. Differential Thermal Analysis: Determination of Melting Point and Glass Transition Temperature.	263
23. Polymerization by Oxidative Coupling: Preparation of Polyphenylene Ether.	271
24. Determination of the Number-average Molecular Weight from Osmometry.	283
25. Determination of the Weight-average Molecular Weight from Light Scattering .	293
26. The Use of a Vapor Pressure Osmometer to Characterize Polymers of Low Molecular Weight: The Determination of the Molecular Weight of an Epoxy Resin.	307
27. Identification of Structural Features in Polymers by Means of Infrared Spectroscopy.	315
28. Gel Permeation Chromatography: A Study in Molecular-Weight Distribution.	327
Appendix	
A. Glossary of symbols.	339
B. Densities of Some Common Polymers.	345

C. Solubility Parameters for Liquids.	346
D. Data for the Evaluation of Copolymer Reactivity Ratios.	349
E. Tabulation Sheet for Gel Permeation Chromatography.	351
F. Computer Programs for Selected Experiments.	353
G. Sources of Equipment.	371
H. Sources of Chemicals	373
Name Index	379
Subject Index	387
