

## CONTENTS

Contents	3
1. Introduction	4
2. Filled Polymers	5
2.1 Electromagnetic interference: EMI shielding with filled polymers	7
2.2 Signature materials	9
3. Inherently conductive polymers	13
3.1 Doping	14
3.2 Conductive mechanisms, theory	16
3.2.1 Polyacetylene	16
3.2.2 Other conjugated polymers: Polyparaphenylene (PPP), polypyrrole (Ppy) and others	
3.3 Technological applications for inherently conductive polymers	21
3.3.1 Electric batteries	22
3.3.2 Electrically operated vehicles	26
3.3.3 Submarine batteries	29
3.3.4 Market analysis for batteries	31
3.4 Other applications for conductive polymers	31
4. Piezoelectric, pyroelectric polymers	32
4.1 Technological use for PVF2	34
4.2 Hydrophones	35
4.3 Other uses for PVF2	35
5. R&D in the area of conductive polymers	36
5.1 R&D in the Sweden	38
