

## CONTENTS

1. Twenty Years Hard Labor as a Fiber Diffractionist	1
2. Problem Areas in Structure analysis of Fibrous Polymers	31
3. Recent Developments in Structure Analysis of Fibrous Polymers	43
4. Simulation of Fiber Diffraction Patterns	61
5. Application of the Rietveld Whole-Pattern-Fitting Method to Linear Polymer Structure Analysis	69
6. Accurate Fiber X-ray Diffraction Data from Films: Data Array Calculations	93
7. AXIS: A Semi-Automated X-ray Intensity and d-Spacing Analyser for Fiber Diffraction Patterns	113
8. Resolution of X-ray Intensities by Angular Deconvolution	139
9. Computational Methods for Profile Resolution and Crystallite Size Evaluation in Fibrous Polymers	149
10. Diffraction from Nonperiodic Structures: The Molecular Conformation of Polytetrafluoroethylene (Phase II)	183
11. Crystallinity and Disorder in Textile Fibers	193
12. The Structure of the Amorphous Phase in Synthetic Polymers: An X-ray Approach	215
13. The Variable Virtual Bond: Modeling Technique for Solving Polymer Crystal Structures	225
14. N-H Mapping for Polymers	239
15. Theoretical Estimates of Helical Structure in Polynucleotides	251
16. Contribution of Electron Diffraction on Single Crystals to Polymer Structure Determination	267
17. Electron Diffraction and Dark Field on Ultrathin Sections of Textile Fibers	279
18. Structure of High Modulus Fibers of Poly-p-Phenylene Benzobisthiazole	303
19. Refinement of Cellulose and Chitin Structures	315
20. Accuracy of Polymer Structure Determination: A Comparison of Published Structures of Poly(tetramethylene terephthalate)	335
21. Technique and Sample Preparation for Plant Tissue	349
22. Fiber Diffraction and Structure of (1-3)- $\alpha$ -D-Glucan in Fungal Cell Walls	351
23. Crystal Structure of (1-3)- $\alpha$ -D-Glucan	353
24. Ultrastructure of Curdlan	363
25. The Gelling Mechanism and Relationship to Molecular Structure of the Microbial Polysaccharide Curdlan	385
26. Fiber Diffraction Studies of Bacterial Polysaccharides	411
27. Review of the Structures of Klebsiella Polysaccharides by X-ray Diffraction	429
28. Crystal Structures of Amylose and Its Derivatives: A Review	459
29. Some New Polynucleotide Structures and Some New Thoughts About Old Structures	483
Index	503
