Contributors	v
Preface to Volume 7	ix
Synthesis and Properties of Photoresponsive Polymers	1
H. KAMOGAWA <i>Faculty of Engineering, Yamanashi University</i>	
I. Introduction	3
II. Photochromic Polymers	4
III. Fluorescent Polymers	39
IV. Polymeric Ultraviolet Absorbers	42
V. Semiconductive Polymers	44
VI. Photoredox Polymer Catalysts	55
VII. Conclusion	60
Synthetic Polymers Containing Nucleic Acid Bases and Their Derivatives	63
M. KINOSHITA and K. YAMAUCHI <i>Faculty of Engineering, Osaka City University</i>	
M. IMOTO <i>Faculty of Engineering, Kansai University</i>	
I. Introduction	64
II. Vinyl Polymers Having Nucleic Acid Bases as Side Groups	64
III. Synthesis of Polymers Having Nucleic Acid Bases through Polyaddition	73
IV. Synthesis of Polymers Having Nucleic Acid Bases through Polycondensation	74
V. Synthesis of Polyvinyl Alcohol Having Nucleic Acid Bases as Side Groups through Polymer Reactions	89
VI. Properties and Applications of Synthetic Nucleic Acid Analogs	97

Radical Polymerizations of Diallyl Dicarboxylates	107
M. OIWA and A. MATSUMOTO	
<i>Faculty of Engineering, Kansai University</i>	
I. Introduction	108
II. Kinetics in the Early Stage of Polymerization of Diallyl Dicarboxylates	109
III. Gelation	119
IV. Copolymerization of Diallyl Dicarboxylates	128
V. Post-Polymerization of Diallyl Phthalate Pre-polymer	141
Structural Features of Solid-State Polymerization	149
Y. CHATANI	
<i>Faculty of Science, Osaka University</i>	
I. Introduction	150
II. Addition Polymerization	154
III. Polycondensation	168
IV. Ring-Opening Polymerization	171
V. Canal Polymerization	189
VI. Conclusion	220
Physical Properties of Crystalline Polymers under High Pressure	225
T. TAKEMURA	
<i>Faculty of Engineering, Kyushu University</i>	
I. Introduction	226
II. Instrumentation	227
III. Mechanical Relaxation under High Pressure	232
IV. Solid-Solid Transition	236
V. Gruneisen Parameter	244
VI. Nuclear Magnetic Resonance Studies	252
VII. Solid-Liquid Transition	256
Studies on the Structure of Polypeptide and Protein Molecules	273
T. SHIMANOCHI	
<i>Faculty of Science, University of Tokyo</i>	
Y. KOYAMA	
<i>Faculty of Science, Kwansai Gakuin University</i>	
K. ITOH	
<i>College of Technology, Gunma University</i>	
I. Basic Concepts and Starting Point of Research	275
II. Conformation of Model Compound Molecules for Polypeptide Chains	281

III. Vibrational Spectra and Conformations of Poly (α-Amino Acids)	322
Index	369
Cumulative Author Index, Volumes 1-6	375
Cumulative Subject Index, Volumes 1-6	378
