

CONTENTS

1. Introduction	1
2. Preparation, Fabrication, and Characterization of Polymers	5
I. Techniques for Preparing and Handling Polymers	5 ✓
II. Fabrication of Polymers	17
III. Polymer Characterization	32
3. Polycondensation and Hydrogen Transfer Polymerization	57
I. Polyamides and Related Polymers	60
II. Polyureas and Related Polymers	92
III. Polyurethanes	105
IV. Polyesters	111
V. Miscellaneous Condensation Polymers	127
4. Addition Polymers from Unsaturated Monomers	149
I. General Considerations	149
II. Free Radical Polymerization of Vinyl Monomer—Experimental Methods	156
III. Free Radical Catalyzed Polymerization of Monosubstituted Ethylenes	159
IV. Free Radical Polymerization of 1,1-Disubstituted Ethylenes	182
V. Free Radical Polymerization of Other Di-, Tri-, and Tetra-substituted Olefins	188
VI. Cationic Polymerization of Vinyl Compounds	190
VII. Anionic Polymerization of Vinyl Compounds	195
VIII. Stereospecific Polymerization of Olefins	201
IX. Copolymers	209
X. Diene Polymers and Copolymers	215
5. Ring Opening Polymerization	235
I. General Discussion	235
II. Cyclic Amides	235
III. <i>N</i> -Carboanhydrides of α -Amino Acids	239
IV. Cyclic Esters	242
V. Cyclic Ethers	247
VI. Silicones	257
VII. Preparation and Polymerization of Phosphonitrilic Chloride	262
VIII. Polymerization of Sulfur	263
IX. Polymerization of Sulfur Nitride	264

6. Nonclassical Routes to Polymers	267
I. Cyclopolymerization	267
II. Polymerization of the Carbonyl Group	268
III. Polymerization of Monoisocyanates	270
IV. Polymerization of Diazo Compounds	272
V. Preparation of Poly-p-xylene	275
VI. Polymerization of Norbornylene	277
VII. 1, <i>n</i> -Polyamides	279
VIII. Polyphenylene Ethers	280
7. Synthetic Resins	285
I. Cross-linked Polyesters	286
II. Resins from the Reaction of Phenol and Formaldehyde	293
III. Reaction of Formaldehyde with Urea and Melamine	298
IV. Ion Exchange Resins from Formaldehyde Condensations	304
V. Epoxy Resins	307
Appendix	315
A. Sources of Equipment	315
B. Sources of Chemicals	316
Index	321
A. Initiator Systems	323
B. Reaction Systems	324
C. Polymerization through Functional Groups	325
D. General Index	328
