

CONTENTS

1. Historical Development of the Theory of the Reactivity of Vinyl Monomers	1
2. Structure and Reactivity of Vinyl Monomers	27
3. Initiation in Free Radical Polymerization	59
4. The Termination Mechanism in Radical Polymerization	99
5. Organometallic Compounds as Radical-Type Initiators for Vinyl Polymerization	125
6. Heterogeneous Metal Peroxides	163
7. Polymerization of α,β -Disubstituted Olefins	179
8. Polymerization of α,β -Unsaturated Carbonyl Compounds	223
9. Cationic Polymerization of Vinyl Monomers by Metal Alkyl Catalysts	283
10. Rate Constants of Elementary Reactions in Cationic Polymerization	313
11. Elementary Steps in Anionic Vinyl Polymerization	345
12. Molecular Rearrangements in the Polymerization of Vinyl Monomers	449
Author Index	509
Subject Index	531
