

CONTENTS 547.8434

Preface.....	vii
I. History of the Development of Phenoplasts	1
II. Chemical Structure of the Phenoplasts	6
A. General Reaction of Phenols with Aldehydes	7
B. The Resoles	9
Curing Stages of Resoles	11
Kinetics of A-Stage Reaction	12
Chemistry of Curing Reactions	17
Kinetics of the Curing Reaction	28
C. The Novolacs	29
Decomposition Products of Resites	36
D. Acid-Cured Resites	38
E. Composition of Technical Resites	39
Summary	43
III. Phenoplasts from Higher Aldehydes	45
1. Acetaldehyde	46
2. Butyraldehyde	47
3. Chloral	48
4. Furfural	48
5. Acrolein	50
IV. Phenoplasts from Polyhydric Phenols	51
V. The Physical Structure of the Phenoplasts	55
A. Introduction	55
B. X-Ray Examination	55
C. Electron Microscope Examination	57
D. The Isogel Theory of Phenoplast Structure	59
E. The Spherocolloid Theory of Phenoplast Structure	62
F. Further Swelling Experiments	63
G. Development of Structure in A-Stage Resin	67
H. General Picture of Phenoplast Structure	68
I. Structure of Cast Phenoplasts	72

VI. Fillers for Phenoplast Molding Powders	74
A. Introduction	74
B. Types of Filler	75
C. Effect of Filler on Impact Strength and Damping	76
D. Microscopic Structure of Fillers	78
E. Ratio of Resin to Filler	78
F. Standard Classification of Phenoplast Molding Powder According to Filer	79
1. United States Navy Classifications.	79
2. United States Air Corps Classification	81
3. American Society for Testing Materials	81
4. German Classification	82
6. British Standards Designations	83
G. Properties of Individual Fillers	83
1. Cellulose Derivatives	83
2. Wood Flour	84
3. Walnut-Shell Flour	85
4. Cottonseed Hulls	85
5. Cellulosic Fibers	86
6. Textile By-products	92
7. Proteinaceous Fillers	94
8. Carbon Fillers	95
9. Mineral Fillers	95
VII. Fillers and Resins for Phenoplast Laminates	99
A. Classification of Laminates	100
1. Laminated Phenolic Sheets	101
2. Laminated Phenolic Tubes	102
3. High Strength Paper Laminates	104
4. Plastic Bonded Cotton Fiber	107
5. Glass Fabric Filler	108
B. Resins Used for Laminates	108
VIII. Mechanical Properties of Molded Phenoplasts	110
A. Introduction	110
B. Mechanical Properties Covered	111
C. Phenoplast Properties at Room Temperature	111
1. Effect of Degree of Cure on Physical Properties	113
2. Tensile Strength	114
3. Modulus of Elasticity	116
4. Compressive Strength	116
5. Flexural Strength	117
6. Shear Strength'	118
7. Bearing Strength	118
8. Impact Resistance	118
9. Creep and Stress Endurance	120
10. Fatigue Resistance	127

CONTENTS

D. Influence of Temperature on Mechanical Properties	128
Influence of Temperature on Creep	135
E. Theoretical Discussion of Strength Properties of Phenoplasts	140
F. Strength-Weight Comparisons with Metals	144
IX. Mechanical Properties of Laminated Phenoplasts	146
A. Introduction	148
B. Mechanical Properties at Ordinary Temperatures	148
1. Tensile Strength	148
2. Modulus of Elasticity	149
3. Compressive Strength	150
4. Flexural Strength	150
5. Shear Strength	151
6. Bearing Strength	151
7. Impact Resistance	152
8. Creep and Stress Endurance	152
9. Fatigue Resistance	154
10. Abrasion Resistance	155
C. Influence of Temperature on Mechanical Properties	156
1. Influence of Temperature on Creep	160
2. Effects of Long Continued Heating	160
D. Effect of Resin Content on Mechanical Properties	165
E. Effect of Moisture Content of Paper Filler before Lamination	168
F. Effect of Laminating Pressure	168
G. Effect of Degree of Cure	169
H. Effect of Moisture Content on Physical Properties	170
I. Mechanical Properties of Post-formed Laminates	171
1. Tensile Strength	172
2. Flexural Strength	172
3. Shear Strength	172
4. Impact Strength	172
5. Water Absorption	172
X. Electrical Properties of Phenoplasts	173
A. Introduction	173
B. Theoretical Discussion	173
C. Numerical Data on Electrical Properties	179
D. Effect of Heating on Electrical Properties	183
XI. Thermal Properties of Phenoplasts	186
A. Introduction	186
B. Coefficient of Expansion	187
C. Flame Resistance	189
XII. Chemical Resistance of Phenoplasts	191
A. Introduction	191
B. Water Absorption	191

C. Effect of Reagents	193
1. Chemical Applications for Phenoplasts	200
2. Resistance to Microorganisms	203
XIII. Oil-Soluble Phenoplasts	204
A. Introduction	204
B. Pure Oil-Soluble Phenoplasts	206
C. The Modified Phenoplasts.	207
D. Reactions of the Phenoplasts with Oils	209
XIV. Phenoplasts as Ion-Exchange Resins. By Donald S. Herr	214
A. Introduction	214
B. Application of Ion Exchange: Theory	217
C. Application of Ion Exchange: Types of Processes	218
XV. Technical Manufacture of Phenoplasts	221
A. Resin Manufacture	221
B. Cast Resins	226
C. Resin Varnishes	227
D. Resin Compound	227
E. Molding Powder	228
F. Phenoplast Molding	230
G. Laminates	230
XVI. Molding Technique for Phenoplasts. By Carl H. Whitlock	232
A. Introduction	232
B. Compression Molding	232
C. Transfer Molding	235
D. Injection Molding	237
E. Molding Practice	238
F. Preheating	241
XVII. Miscellaneous Technical Applications of Phenoplasts	242
A. Wood Adhesives	242
B. Bonding of Insulating Mats	244
C. Resins for Bonding Grinding Wheels	244
D. Wood Impregnation	245
E. Miscellaneous Adhesive Applications	247
F. Brake-Lining Resins	247
G. Cross Linking of Thermoplasts	247
H. War Uses of Phenoplasts	248
Author Index	255
Subject Index	261
