Vol. 2. Synthesis and Materials

Contents of Volume	xxvii
Notation	xxxix

Part IV. Syntheses and Reactions

<i>Chapter 16. Principles of Polymerization</i>	535
16.1. Chemical Requirements	536
16.1.1. Functionality	536
16.1.2. Ring and Chain Formation	537
16.1.3. Cyclopolymerization	541
16.2. Experimental Investigation of Polymerizations	544
16.2.1. Verification and Quantitative Determination of Polymer Formation	544
16.2.2. Isolation and Purification of the Polymer ..	547
16.3. Chain–Monomer Equilibria	548
16.3.1. Definition	548
16.3.2. Equilibrium Constants	550
16.3.3. Influence of the Experimental Procedure ...	553
16.3.4. Influence of Constitution	558
16.3.4.1. Entropy of Polymerization	558
16.3.4.2. Enthalpy of Polymerization	561
16.3.4.3. Gibbs Energy of Polymerization ..	565
16.4. Kinetics and Mechanisms	566
16.4.1. Classification of Polymerizations	566

16.4.2.	Activation and Deactivation
16.4.3.	Kinetics
16.4.4.	Monodisperse Macromolecules
16.5.	Stereocontrol
16.5.1.	Classification and Procedure
16.5.2.	Achiral Stereospecific Polymerizations
16.5.2.1.	Atactic Polymerizations
16.5.2.2.	Bernoulli Statistics
16.5.2.3.	First-Order Markov Statistics
16.5.3.	Chiral Stereospecific Polymerizations
16.5.3.1.	General Relationships
16.5.3.2.	Enantiomorphous Catalysts
16.5.4.	Temperature Dependence
	Literature

Chapter 17. Polycondensations

17.1.	Chemical Reactions
17.2.	Equilibria of Bifunctional Polycondensations
17.2.1.	Equilibrium Constants
17.2.2.	Conversion and Degree of Polymerization
17.2.3.	Molecular-Weight Distribution and Conversion
17.3.	Equilibria of Multifunctional Polycondensations
17.3.1.	Gel Points
17.3.2.	Molecular Weights
17.4.	Kinetics
17.4.1.	Kinetics of Homogeneous Polycondensations
17.4.2.	Kinetics of Heterogeneous Polycondensations
17.5.	Industrial Polycondensations
	Literature

Chapter 18. Ionic Polymerization

18.1.	Basic Principles
18.1.1.	Ions and Ion Pairs
18.1.2.	Elementary Steps
18.1.2.1.	Formation of the Initiating Species
18.1.2.2.	The Start Step
18.1.2.3.	Propagation Steps
18.2.	Chemistry of Anionic Polymerizations
18.2.1.	General Discussion

18.2.2. Initiators	631
18.2.2.1. Basicity of Initiators and Monomers ..	631
18.2.2.2. Start by Zwitterions.....	633
18.2.3. Growth via Macroanions	634
18.2.4. Polymerization via Monomer Anions	637
18.2.5. Termination and Transfer	639
18.3. Chemistry of Cationic Polymerizations	640
18.3.1. General Discussion	640
18.3.2. Initiators	641
18.3.2.1. Brønsted Acids.....	641
18.3.2.2. Salts	641
18.3.2.3. Lewis Acids	642
18.3.3. Propagation	643
18.3.4. Transfer and Termination	645
✓ 18.4. Polymerization Kinetics	647
18.4.1. Polymerization without Transfer and with One Active Species	648
18.4.2. Polymerization with Transfer and with One Active Species	649
18.4.3. Polymerization with Two Active Species	651
18.4.4. Molecular-Weight Distribution	653
18.5. Stereocontrol	657
Literature	658
<i>Chapter 19. Polyinsertion</i>	<i>661</i>
✓ 19.1. Ziegler Polymerization	661
19.1.1. Catalysts	661
19.1.2. Propagation Mechanism	666
19.1.3. Termination Reactions	670
19.1.4. Kinetics	671
✓ 19.2. Pseudoionic Polymerizations	676
19.2.1. Pseudoanionic Polymerizations	676
19.2.2. Pseudocationic Polymerizations	678
19.3. Enzymatic Polyreactions	680
Literature	684
<i>Chapter 20. Free Radical Unipolymerization</i>	<i>685</i>
20.1. Initiation and Start	685
20.1.1. Phenomena	685

20.1.2.	Thermal Decomposition of Free-Radical-Forming Agents	687
20.1.2.1.	Constitution and Formation of Free Radicals	687
20.1.2.2.	Simple Decomposition	690
20.1.2.3.	Induced Decomposition	692
20.1.3.	Thermal Start	693
20.1.4.	Redox Systems	695
20.1.5.	Action of Oxygen	697
20.1.6.	Electrolysis	697
20.2.	Propagation and Termination	698
20.2.1.	Activation of the Monomer	698
20.2.2.	Termination Reactions	701
20.2.3.	The Steady-State Principle	702
20.2.4.	Kinetics at Low Yields	704
20.2.4.1.	Small Concentrations of Initiators	704
20.2.4.2.	Termination by the Monomer	705
20.2.4.3.	Kinetic Chain Length	706
20.2.5.	Absolute Rate Constants	707
20.2.5.1.	Rotating Sector Method	707
20.2.5.2.	Rate Constants and Activation Energies	709
20.2.6.	Molecular Weight and Molecular-Weight Distribution	711
20.2.6.1.	Molecular Weights	711
20.2.6.2.	Molecular-Weight Distribution	713
20.2.7.	Kinetics at High Conversions	715
20.2.7.1.	Dead-End Polymerizations	715
20.2.7.2.	Glass and Gel Effects	717
20.3.	Transfer Reactions	719
20.3.1.	Classification	719
20.3.2.	Transfer to Monomer	721
20.3.3.	Transfer to Solvent	722
20.3.4.	Transfer to the Initiator	725
20.3.5.	Transfer to Polymer	725
20.3.6.	Inhibition and Stabilization	727
20.4.	Stereocontrol	729
20.5.	Industrial Polymerizations	731
✓ 20.5.1.	Bulk Polymerization	731
✓ 20.5.2.	Suspension Polymerization	731
✓ 20.5.3.	Polymerization in Solvents and Precipitation Media	732
✓ 20.5.4.	Emulsion Polymerizations	733

	20.5.4.1. Phenomena	733
	20.5.4.2. Kinetics	736
	20.5.4.3. Product Properties	739
✓	20.5.5 Polymerization in the Gas Phase and under Pressure	741
Literature		743
 <i>Chapter 21. Radiation-Activated Polymerization</i>		 747
✓	21.1. General Review	747
✓	21.2. Radiation-Initiated Polymerizations	748
	21.2.1. Start by High-Energy Radiation	748
	21.2.2. Start by Low-Energy Radiation.....	750
✓	21.3. Photopolymerization.....	751
	21.4. Polymerization in the Solid State	754
	21.4.1. Start	754
	21.4.2. Propagation	755
	21.4.3. Transfer and Termination	757
	21.4.4. Stereocontrol and Morphology	757
Literature		759
 <i>Chapter 22. Copolymerization</i>		 761
	22.1. The Copolymerization Equation	762
	22.1.1. Basic Principles	762
	22.1.2. Experimental Determination of a Copolymerization Reactivity Ratio ..	766
	22.1.3. Special Cases	770
	22.1.4. Sequence Distribution in Copolymers	773
	22.2. Terpolymerization	774
	22.3. Thermodynamics	778
	22.4. Free Radical Copolymerization	778
	22.4.1. Constitution and Reactivity Ratio ..	778
	22.4.2. The Penultimate Chain End Effect ..	780
	22.4.3. Charge Transfer Complexes	782
	22.4.4. Kinetics	783
	22.4.5. Environmental Influence	785
	22.4.6. The $Q-e$ Scheme	787
✓	22.5. Ionic Copolymerization	791
	22.5.1. Phenomena	791

22.5.2. Copolymerization Equations	794
22.5.2.1. Hypotheses	794
22.5.2.2. Ideal Ionic Copolymerization	794
22.5.2.3. Block Copolymerization	795
22.5.2.4. Copolymerization with Prepolymerization Equilibria	797
22.5.3. Kinetics	798
Literature	798
 <i>Chapter 23. Reactions of Macromolecules</i>	 799
23.1. Basic Principles	799
23.1.1. Review	799
23.1.2. Molecules and Chemical Groups	800
23.2. Macromolecular Catalysts	802
23.3. Isomerizations	805
23.3.1. Exchange Equilibria	805
23.3.2. Constitutional Transformations	807
23.3.3. Configurational Transformations	808
23.4. Polymer Analog Conversions	809
23.4.1. Review	809
23.4.2. Polymer Reagents	810
23.4.3. Acid-Base Reactions	811
23.4.3.1. Titration of Polyelectrolytes	811
23.4.3.2. Ion-Exchange Resins	814
23.4.4. Ring-Forming Reactions	815
23.4.4.1. Polymer Analog Conversions	815
23.4.4.2. Two-Step Transannular Reactions	818
23.5. Chain Extension, Branching, and Cross-Linking Reactions	819
23.5.1. Block Copolymerization	820
23.5.2. Graft Copolymerization	821
23.5.3. Cross-Linking Reactions	824
23.6. Degradation Reactions	828
23.6.1. Basic Principles	828
23.6.2. Chain Scissions	829
23.6.3. Pyrolysis	832
23.6.4. Depolymerization	834
A 23. Appendix to Chapter 23. Calculation of Maximum Possible Conversion for Intramolecular Cyclization Reactions	837
Literature	838

<i>Chapter 24. Chemical Aging</i>	843
24.1. Review	843
24.2. Oxidation	844
24.2.1. Processes	844
24.2.2. Antioxidants	848
24.2.3. Flameproofing	851
24.3. Protection against Light	854
24.3.1. Processes	854
24.3.2. UV Stabilizers	855
24.4. Ablation	857
Literature	858

Part V. Polymers

<i>Chapter 25. Carbon Chains</i>	863
25.1. Carbon	863
25.1.1. Diamond and Graphite	863
25.1.2. Coal and Carbon Black	864
25.1.3. Carbon and Graphite Fibers	864
25.2. Polyolefins	865
25.2.1. Poly(ethylene)	865
25.2.1.1. Syntheses	866
25.2.1.2. Properties	870
25.2.1.3. Processing and Applications	871
25.2.1.4. Derivatives	872
25.2.1.5. Copolymers	872
25.2.2. Poly(propylene)	874
25.2.3. Poly(butene-1)	875
25.2.4. Poly(4-methyl pentene-1)	875
25.2.5. Poly(isobutylene)	876
25.2.6. Poly(styrene)	877
25.2.6.1. Syntheses	877
25.2.6.2. Properties and Applications	878
25.2.6.3. Derivatives	879
25.2.6.4. Copolymers	879
25.2.7. Poly(vinyl pyridine)	879
