

TABLE OF CONTENTS

Acknowledgements	ix
Editor's Introduction	
Part I -- General Developments	
Polysaccharide Supports: Synthesis, Derivatization and Application JERKER PORATH, University of Uppsala, Sweden	9
2. Inorganic Packings for GPC	30
JOHN V. DAWKINS, Loughborough University of Technology, U.K.	
3. Polyacrylamide-Agarose Gels -- Structure and applications	57
MICHEL MONSIGNY, MONIQUE CORNET, Centre de Biophysique Moleculaire, Orleans, France; RENE TIXIER, MONIQUE CORGIER and PIERRE GIROT, l'Industrie Biologique Français, Gennevilliers, France	
Poly(acryloyl morpholine) (Enzacryl® Gel) Packings	70
ALAN W. J. BROUGH, ROGER EPTON, GEORGE MARR, ANDREW T. SHACKLEY and GEORGE A. SNIETKO-BLOCKI, Wolverhampton Polytechnic, U.K.	
Poly(hydroxyethyl methacrylate) Gels (Spheron®)	91
JINDRICH BORAK, IVAN CADERSKY, FRANTISEK KISS, MILAN SMRZ and JARMIL VISKA, Lachema Pure Chemicals Institute, Czechoslovakia	
Cellulose Packings in Bead Form -- Porous Structure	109
JOSEPH BALDRIN, JAN PESKA, JIRI STAMBERG, Institute of Macromolecular Chemistry, Prague, Czechoslovakia; JURGEN LUDWIG and DIETER PAUL, Institute of Polymer Chemistry, Teltow-Seehow, G.D.R.	
The Role of Polymer Structure in Fractionation by GPC.	122
DALE J. HARMON, The B. F. Goodrich Company Inc., Ohio, U.S.A.	
Composite Polystyrene Packings for GPC.	146
TREVOR J. CRIGHTON and FRANK W. PEAKER, University of Birmingham, U.K.	

	Theoretical and Experimental Aspects of Fractionation Mechanisms on Crosslinked Organic Polymers	156
	JACQUELINE LECOURTIER, ROLAND AUDEBERT and CLAUDE QUIVORON, l'Universite Pierre et Marie Curie, Paris, France	
10.	Service Problems in GPC.	169
	L. JACK MAISEY, Rubber and Plastics Research Association, Shrewsbury, U.K.	
11	Thin Layer Gel Chromatography	
	JAMES N. MILLER, Loughborough University of Technology, U.K.	
Part 2 -- Preparative and Industrial Scale Chromatography		
12.	Preparative Gel Permeation Chromatography	
	MERVYN F. VAUGHAN and ROY DIETZ, National Physical Laboratory Teddington, U.K.	
13.	Continuous Chromatography of Macromolecular Solutes	218
	PHILLIP E. BARKER, F. JOHN ELLISON and BRIAN W. HATT, University of Aston in Birmingham, U.K.	
14.	Column Fractionation of Macromolecules by Gradient Elution	240
	ANTHONY R. COOPER, Dynapol Inc., Palo Alto, California. U.S.A.	
Part 3 -- Specialized Applications, Theory and Techniques		
	Application of Controlled Pore Glass Chromatography to Milk Proteins.	269
	ROBERT D. KEARNEY and THOMAS C. A. MCGANN, Agricultural Institute, Co. Cork. Ireland	
16.	Assessment of Coagulants for Cheddar Cheesemaking by Gel Filtration	275
	MARGARET L. GREEN, National Institute for Research in Dairying, Sheffield, U.K.	
7	Gel Chromatography of Horseradish Peroxidase-Antibody Conjugates	279
	DICK M. BOORSMA, Free University Academic Hospital, Amsterdam. The Netherlands	
	Partitioning between Aqueous Polymer Phases in Gel Filtration	285
	JOHN BREWER and LENNART SODERBERG, Pharmacia Fine Chemicals, Uppsala, Sweden	
19.	Gel and Glass Matrix Parameters Obtained from Chromatographic K_d versus Stokes Radius Plots by Assuming Defined Cavity Models	289
	HENRIK WALDMANN-MEYER, Technical University of Denmark	
	Whole Polymer Reference Materials in Analytical GPC	!97
	CAROLE M. L. ATKINSON, ROY DIETZ and MICHAEL A. FRANCIS, National Physical Laboratory, Teddington, U.K.	

Table of Contents

vii

Chain-Extended Polyethylene and GPC	304
D. C. BASSETT, B. A. KHALIFA and R. H. OLLEY, University of Reading, U.K.	
Comparison of Branching Distribution of Low Density Polyethylene by Large Scale Precipitation Chromatography and Analytical GPC	31
DIDIER CONSTANTIN and MAURIUS HERT, C.d.F. Chimie, Centre de Recherches Nord. Mazingarbe, France	
23 Gel Permeation Chromatography of Cyclic Siloxanes	316
J. ANTHONY SEMLYEN, University of York; and PETER V. WRIGHT University of Sheffield, U.K.	
24 Characterization of Non-Ionic Micelles by GPC	324
COLIN BOOTH, JEAN-LUC FORGET, THOMAS P. LALLY, TIMOTHY de V NAYLOR and COLIN PRICE, University of Manchester, U.K.	
Purification of Protected Peptides by GPC	331
IAN J. GALPIN, BALRAJ K. HANDA, GEORGE W. KENNER, STANLEY MOORE and ROBERT RAMAGE, University of Liverpool, U.K.	
Porous Silica Supports for High Performance Exclusion Chromatography	330
JOHN D. F. RAMSAY, Chemistry Division, AERE Harwell, U.K.	
Porous Silica GPC Packings for Molecular Weights Exceeding One Million	344
ANTHONY R. COOPER, Dynapol Inc., Palo Alto, California, U.S.A.	
28 Ionic Strength Effects in Aqueous GPC with Porous Glass Packings.	354
ANTHONY R. COOPER and DAVID P. MATZINGER, Dynapol Inc., Palo Alto California. U.S.A.	
Index	350
